**Petua transliterasi/transkripsi Arab-Rumi keluaran ASASI ini yang berbeza daripada Petua-Petua Popular yang Lain seperti LC (*Library of Congres*), DBP (Dewan Bahasa dan Pustaka), dan IYL (Individu/Institusi yang Lain)**

Huruf Arab	LC	DBP/IYL	ASASI
(‘ain)	‘	‘ / ‘	‘
(tdo)	ṭ	ṭ / t	td
(ta marbutdaht)	t atau h	ṭ	ht
(ha nipis)	ḥ	ḥ / ḥ	ḥ
(ho tebal)	ḥ	ḥ	ḥd
(zai nipis)	dh	dh/ts/tz	dz
	th	th/ts	th
(za tebal)	z	Z	zh
(syain)	sh	sy	sy
(dho tebal)	d	d	dh
(sho tebal)	S	S / sh	sh

harkaht atau sabdu/dengung ditandakan dgn ulangan huruf berkenaan. Contohnya *al-Quraan* menunjukkan bunyi a itu dipanjangkan dua harkaht. tamattu ‘ menunjukkan bunyi t itu disabdukan.

### **Imbauan kepada Penulis**

ASASAINS sentiasa **menghalu-alukan** sebarang bentuk penulisan atau berita yang mengandungi perutusan sains Islam (mengikut selera atau tafsiran masing-masing) untuk dimuatkan ke dalam warkah berita ini.

%%%%%

**``I like Islam, it is a consistent idea of religion and open-minded``**

**(Kurt Godel**, seorang ahli matematik agung Eropah abad ke-20, spt yg dipetik oleh Hoo Wang dlm buku beliau ``*A Logical Journey: From Godel to Philosophy*``, terbitan The MIT Press. 1996. Cambridge Massachusetts, AS)

# Maklumat ASASI

**Status Keanggotaan ASASI** (seperti pada 31 Disember 2013): sekitar 300 orang

**Anggota Kehormat:**

Abdullah bin Salleh, Tan Sri mantan KPE Petronas & KSU Negara (Pulang ke RMA, 2005), A.Y.  
Ainuddin bin Abdul Wahid, Tan Sri, mantan NC UTM (mulai 1980-an), A.Y  
Mohd Ariffin bin Hj. Suhaimi, Dato' Dr., mantan Prof. & Tim. Rektor UIAM (mulai 1990-an)  
Osman bin Bakar , Prof. Dato' Dr. , mantan Pres. ASASI, mantan TNC,UM; mantan Kerusi Pengajian Islam Univ. George Washinton, AS; Tim. KPE IAIS (mulai 2009)  
Sayed Muhammad Naguib Al-Attas, Prof. Dr. mantan Pengarah IBKKM (kini ATMA, UKM), mantan Pengarah ISTAC (Anggota kehormat pertama, mulai 1980-an).  
Tg. Mohd Azzman Shariffadeen b. Tg. Ibrahim, Ph.D, Dato', FASM, mantan Dekan Fakulti Kejuruteraan Universiti Malaya dan Pengerusi & Ketua Eksekutif MIMOS (mulai 2009)

**Anggota Seumur Hidup:** tiada maklumat

**Anggota Biasa:** tiada maklumat

Akademi Sains Islam Malaysia atau lebih dikenali sebagai ASASI ditubuhkan pada 1977 oleh sekumpulan ahli sains dan teknologi muslim Malaysia. Pada mulanya Akademi ini memang tidak ditujukan kepada ahli sains sosial atau kemanusiaan, tetapi mulai lebih kurang sedasawarsa penubuhannya, perlembagaannya dipinda supaya semua ilmuwan dalam bidang apa pun dapat menganggotainya sesuai dengan makna sains mengikut perspektif Islam. Kini anggota ASASI menjangkau lebih daripada 300 orang ahli (kebanyakannya ahli akademik dan peiktisasi) dalam pelbagai bidang ilmu. Sesiapa yang memiliki ijazah dalam apa juga bidang layak memohon menjadi ahli biasa ASASI. Selainnya bolehlah memohon untuk menjadi ‘ahli bersekutu’. ASASI juga menawarkan kepada seseorang individu menjadi ahlinya bertaraf Anggota Kehormat jika seseorang rakyat Malaysia Muslim itu dianggap banyak memberi sumbangan pembangunan sains atau teknologi kepada umat Muslim di Malaysia.

## Tujuan

1. Untuk menghidupkan semula tradisi sains berdasarkan al-Quran, iaitu satu bentuk kajian tentang alam tabii atau fenomenon dan telatah yang tidak memisahkanya daripada prinsip-prinsip Islam.
2. Untuk memperkenalkan dan mendokong konsep dan falsafah sains Islam bersama-sama dengan etika Islam dalam kegiatan sains dan penyelidikan.
3. Untuk menggalakkan kajian sains di kalangan masyarakat dan menjadikan al-Quran sebagai satu daripada sumber inspirasi, hidayah dan rujukan dalam kegiatan sains.
4. Untuk berpegang teguh kepada keinginan dan tekad bagi mengembalikan bahasa Arab, sesuai dengan peranannya sebagai bahasa al-Quran, kepada kedudukannya yang asal dan betul sebagai bahasa sains dalam dunia Islam.
5. Untuk melakukan usaha memadu, mengamir atau mengintegrasikan dan menggembungkan para ilmuwan muslim ke arah membangun dan memajukan masyarakat Islam terutamanya dalam S & T.
6. Untuk bekerjasama dengan organisasi-organisasi lain, dalam dan luar negara. Bagi memastikan kegunaan ilmu sebagai alat untuk mencapai kebahagian di dunia dan akhirat dan bukan untuk pemusnahan insan.

ASASI menerbitkan warkah berita dwitahunannya berjudul ASASAINS sejak penubuhannya, dan sejak 1990 ASASI juga menerbitkan jurnal ilmiah dwitahunannya berjudul Kesturi. ASASI juga menerbitkan buku-buku ilmiah dan pascasidang kepada simposium dan sebagainya anjuran ASASI dari masa ke masa, terutamanya tentang pengislaman ilmu atau isu-isu semasa mengikut perspektif Islam seperti buku-buku berikut:

- ◆ Shaharir b.M.Z. 2011. *Kritikan Teori Kenisbian dan Teori Qusantum*. Shah Alam: ASASI
  - ◆ Yusof M.Hj. O. et al. & ASASI. 2000. *Siri Wacana Sejarah dan Falsafah Sains* 8. Kuala Lumpur: DBP
  - ◆ Shaharir b. M. Z. 2000. *Pengenalan Sejarah dan Falsafah Sains*, Suntingan Kedua. (snt. Pertama: 1987). Bangi: UKM.
  - ◆ Mabud S.A. 1991. *Theory of Evolution : an Assessment from the Islamic Point of View*.
  - ◆ Osman b. B. (Pty.). 1989. *Pemikiran Sains Masa Kini*. Pascasidang.
  - ◆ Osman b. B. 1987. *Al-Farabi: Life, Works and Significance*. Terj-nya terbitan Dewan Bahasa dan Pustaka, 1991 [*Al-Farabi, kehidupan, hasil karyanya dan peri penting tokoh*]
  - ◆ al-Attas S.M.N. 1981. *A positive Aspect of Tasawwuf. A Preliminary Thought*. ASASI
  - ◆ Sulaiman b. N. 1978. *Teori Evolusi. Satu Fakta atau Hipotesis?*
  - ◆ Bucaille M. 1978. *Qur'an and Modern Science*.

konsep khiyar menurut syeikh daud bin abdullah al-fatani dalam *furu' al-masa'il*. Hadenan  
Towpek,

The book of *Furu' al-Masa'il* by Sheikh Daud bin Abdullah al-Fatani (1131-1265H/1718-1847M), an Islamic religious work written in jawi, was considered a masterpiece in the field of Islamic jurisprudence at the time of his appearance in the nineteenth-century. This book contains almost all the titles in the field of Islamic jurisprudence including fiqh al-mu'amalat or Islamic transactions. One of the titles covered in fiqh al-mu'amalat, which is no less important, is the title of khiyar or option. Therefore, this article attempts to analyse the concept of khiyar as discussed by Sheikh Daud in this book.

bank air susu ibu (asi) dalam tinjauan hukum islam. fanani, ahwan menteologikan demokrasi:  
pemikiran nurcholish madjid tentang islam dan demokrasi. H.Z., Syarafuddin

He used apologetic approach to engage liberal democracy inhearence with Islam. His apologetic approach affirms that Islam is universal in nature that equals with democracy principals and secularization that means separating religion and politic. Nevertheless, his views on Islam and democracy have a blind spot. This article will argue that he has failed to pull both Islam and democracy as universality rather his concept of universalism has trapped to its par-ticularity. In addition his view on secularism is problematic if it collides to the current phenomena of democratic ideal principle on political plurality.

**Arabic Scs & Philos.** – dwibahasa: Perancis dan Inggeris

An international journal devoted to the Arabic sciences, mathematics and philosophy in the world of Islam between the eighth and eighteenth centuries, in a cross-cultural context. In 2009, the journal extended its scope to include important papers **on scientific modernization from the nineteenth century in the Islamic world.**

Together with original studies on the history of all these fields, *ASP* also offers work on the inter-relations between Arabic and Greek, Indian, Chinese, Latin, Byzantine, Syriac and Hebrew sciences and philosophy. Casting new light on the growth of these disciplines, as well as on the social and ideological context in which this growth took place, *ASP* is essential reading for those interested in these areas.

2013, 23(1):

early ibādī theological arguments on atoms and accidents. Abdulrahman Al-Salimi

The goals of this article are: 1) to characterize the classical Ibādī theological literature dealing with the atomistic theory of substance and accident; 2) to review the texts of Ibādī scholars as they argued and engaged with other Islamic theological schools: pre-Bahshamiyya Mu'tazilites (Abū Hāshim al-Jubbā'ī, d. 321/933) and Ash'arites (Abū al-Hasan al-Ash'arī, d. 324/936), in relation to the atomistic theory of substance and accident during the 3rd/9th century; 3) to survey the wide range of opinions among the early Ibādī theologians, and to examine the specific sources and themes that may have influenced this multifarious school of thought. Likewise, it is the aim of this article to demonstrate the common features in the Ibādī approach to producing theological literature during the formation of Islamic theology, and to explore how these early theologians may have gained access to cosmological themes that predate Islam.

### **The Sociology of Islam and Muslim Societies Newsletter:**

The major aim of this network is to study and understand the sociological aspects of Islam and Muslim Societies. In this context, the concept of Sociology of Islam has been borrowed from Dr. Ali Shariati, whereas the concept of Muslim Societies was borrowed from Ernest Gellner's argument. We believe that these two scholars represent core aspects of current changes in Islam. Both scholars rejected the Orientalist understanding of Islam and Muslims. Therefore, we take a similar approach in this network.

Secularism and the cultures of nineteenth-century scientific naturalism. M. Rectenwald

Abstract: While historians have noted the importance of evolutionary thought for freethinking radicals from the 1840s, and others have traced the popularization of agnosticism and Darwinian evolution by later Victorian freethinkers, insufficient attention has been paid to mid-century Secularism as constitutive of the cultural and intellectual environment necessary for the promotion and relative success of scientific naturalism. I argue that Secularism was a significant source for the emerging new creed of scientific naturalism in the mid-nineteenth century. Not only did early Secularism help clear the way by fighting battles with the state and religious interlocutors, but it also served as a source for what Huxley, almost twenty years later, termed ‘agnosticism’.

Cth:

moral cleansing and moral licenses: experimental evidence. Pablo Brañas-Garza et al.  
experimental philosophy of economics. Michiru Nagatsu

I argue that a new empirical approach called experimental philosophy of science is a promising approach to advance the philosophy of economics. In particular, I discuss two debates in the field, the neuroeconomics controversy and the commonsense realism debate, and suggest how experimental and survey techniques can generate data that will inform these debates. Some of the likely objections from philosophers and economists are addressed, and possible ways of operationalizing different preference concepts are illustrated.

### **Teori topos**

A First Course in Topos Quantum Theory. Cecilia Flori  
Elements of Temporal Topos. Goro C. Kato

There are several approaches to quantum gravity. The most well known approach is string theory (M-theory), followed by loop quantum gravity. Temporal topos (t-topos) is an application of a modified topos over a category with a Grothendieck topology. We give explicit formulations in terms of t-topos for characteristic microcosmic phenomena such as wave-particle duality, uncertainty principle, and quantum entanglement. In order to claim that t-topos theory is leading to quantum gravity with the same mathematical model, i.e., t-topos, we need to formulate also relativistic notions as a light cone, gravitational effect by mass, black hole, and big bang. The main devises of t-topos as a unifying theory of microcosm and macrocosm are the notions of a (micro) decomposition of a presheaf and a (micro) factorization of a morphism of a t-site. Before the chapter on t-topos, we provide the necessary mathematical background from categories, sheaves, cohomologies, and D-modules, which can be useful to study the connections to twister covering cohomology, abstract differential geometry, and p-adic string theory.

History of Science, Philosophy and Culture In Indian Civilization: Vol VII Part 9 Buddhism . Pande C XQ solution: our side of maths (Volume 1). david pinto

The central postulate for XQ is that there is another side to maths, a side that is not concerned with modelling things (cf this side of maths). The processes of counting, arithmetic, algebra, calculus, recursion have correlates in the concurrent processes of consciousness (cf subjective methodology). The purpose of exploring XQ is not simply an intellectual endeavour however interesting it might be, but the intention is to offer a means of bridging west and east through the medium of mathematics, the two great traditions of western science (cf boundaries of science) and eastern meditation (cf buddhist prescription).

Darwin's Ghosts: The Secret History of Evolution . Rebecca Stott

Soon after the publication of On the Origin of Species, Charles Darwin received an unsettling letter that accused him of taking credit for a theory that had already been discovered by others. Realizing his error of omission, Darwin tried to trace all of the natural philosophers who had laid the groundwork for his theory, but he found that history had already forgotten many of them. Rebecca Stott goes in search of these ghosts, telling the epic story of the discovery of evolution and natural selection from Aristotle to the ninth-century Arab writer Al-Jahiz to Leonardo da Vinci to the brilliant naturalists of the Jardin des Plantes to Alfred Wallace and Erasmus Darwin, and finally to Charles Darwin himself.

Euclid and Jesus: How and why the church changed mathematics and Christianity across two religious wars . C. K. Raju

Strangely, Greek manuscripts do not mention Euclid, but speak anonymously of the “author of the Elements”. Did Euclid exist? Was the real author of the Elements a woman, Hypatia? Was she black? The mystery geometry of black Egypt aimed to arouse the soul, and prove equity, as in Plato's story of Socrates and the slave boy. Early Christians had similar beliefs about the soul, but the church changed Christian doctrine to enable its priests to rule. When pagans resisted, the church retaliated violently: it smashed their temples, burnt their libraries, cursed the early beliefs about the soul, and banned philosophy. This plunged Christendom into its Dark Age, but catalysed the Islamic Golden Age. The contrast fuelled envy, and Christian priests incited the Crusades, hoping to grab Muslim wealth—but the Crusades failed beyond Spain. To convert Muslims, who accepted reason, the church now sought mathematics, connecting it to Christian doctrine by changing both. That led to a subtle religious bias in mathematics, and to its racist history. This book is for the layperson concerned that both biases are still being thrust upon schoolchildren today.

Evolution, Science and Judaism: A Jewish View . 2<sup>nd</sup> ed. Issac Joseph Brandstadter

During the twentieth century, myriads were spellbound by the theory of Evolution a religion of the vogue intellectual, which precluded the least semblance of divine design. The theory today more so than ever stands tottering on a sinking foundation. Now, with its discrediting, the door is opened to appreciate the solid and untarnished historical position of Judaism the original creation of our universe and the divine programming of all living species.

Psychology and the Perennial Philosophy: Studies in Comparative Religion . S. B.Sotilos (Pnyut.)

Modern psychology is at an impasse as it searches anxiously for new therapies to address the increasing occurrence of mental illness in contemporary society. In this groundbreaking anthology, leading authors

from the perennialist school, including Huston Smith, Seyyed Hossein Nasr, and Frithjof Schuon, draw on the age-old insights of the world's wisdom traditions to argue that modern psychology—behaviorism, psychoanalysis, humanistic and transpersonal psychology—overlooks the specifically spiritual factors contributing to mental health and illness.

Islamic marketing - a challenger to the classical marketing canon? Wilson J. A.J. & Grant J. [Journal of Islamic Marketing](#), Volume 4, Number 1

Where Theory and Law Meet: Trends in establishment clause jurisprudence in the US federal courts and implications for science education. King L.E. & Southerland S. A.

In this study, federal court opinions and writings of legal scholars, spanning 63 years of establishment clause jurisprudence in the US federal courts were analysed in an effort to determine dominant trends in judicial philosophy that are of significance to science educators. The study's findings suggest that the dominant legal theory underpinning the adjudication of establishment clause cases on the US Supreme Court has undergone a shift from one that emphasizes *separation* of church and state to one that favours *integration* of religion in the public sphere. This development poses significant challenges to science educators who are charged with the task of teaching in accordance with state science standards that emphasize topics that are considered controversial (e.g. evolution and global climate change) by many in the faith-based community. These findings constitute a basis for forecasting future actions in US courts regarding the role of government in establishing religious practices in the public sphere—particularly where such actions intersect with the roles of teachers in the nation's public K-12 science classrooms.

Finally, we argue that scientists and science educators must adopt an assertive stance in defining science in curricular frameworks, providing something for the courts to draw upon in future decisions.

Russian and American Cosmism: Religion, National Psyche, and Spaceflight. *Astropolitics*, Volume 11, Numbers 1-2, 1 January 2013, pp. 25-44(20); *International Journal of Science Education*, Volume 35, Number 5, 1 March 2013, pp. 773-795(23)

A product of science, religion, and national culture, cosmism is reflected in academic and popular views about our place in the universe, space exploration, and human destiny. Although linked historically to the Russians, cosmism captures many aspects of American thinking about space. The present comparison shows that prophets, prophecies, striving for perfection, utopian visions, and hopes for salvation are evident in both Russian and American thought, but that there are also differences. Geert Hofstede's cross-cultural research on national values—power distance, individualism, masculinity, and uncertainty avoidance—is useful for understanding Russian-American differences. Russian acceptance of power inequalities, collectivism, concern for group welfare, and aversion to uncertainty lead to constellations of beliefs and emotions about spaceflight that differ from those bred by American egalitarianism, individualism, obsession with personal achievement, and acceptance of uncertainty. Both Russian and American thinking include occult and paranormal phenomena, but Americans have been more reluctant to assimilate such influences within mainstream science. As a concept, American cosmism captures the occasional blurring of the lines between religion and science in discussions of humanity's place in the universe and future in space.

## Kegiatan ASASI & Institut Berjenama Islam di Malaysia Jan-Jun 2014

### Kegiatan ASASI

Kumpulan sarjana muda ASASI yang layak digelar **Kumpulan Alnuurani**, ringkasnya **KuAlnuurani** (diprakarsai dan diketuai oleh Dr. Alinor) telah mengadakan siri wacana mereka bertempat di restoran pilihan mereka, "Restoran Yus" di Bandar Baru Bangi secara dwimingguan mulai 9 mln hingga sekitar 12 mln. seperti yang dilaporkan dalam Asasains 2013 jilid 1 dahulu. Dalam tahun 2013, kumpulan ini bergerak mengikut beberapa buah kumpulan: Kumpulan Bahasa dan Linguistik, Kumpulan Ekonomi dan Pengurusan, Kumpulan Etnosains, Kumpulan Falsafah, dan Kumpulan Fizik Teori. Kegiatan mereka ini adalah seperti berikut:

#### Kumpulan Ekonomi dan Pengurusan

17 Mei 2014: Perbincangan ke-3 di PSL, UKM dng pembentangnya Muhammad Harunrashid, Teori niiai buruh dan nilai semula jadi kerja menurut David Ricardo; dan Hamid Razak, konsep "al-Mal " atau pemilikan harta (menurut Islam)

21 Jun 2014: Perbincangan ke-4 di PTSI, UKM dng pembentangnya Muhammad Harunrashid, Penilaian prinsip perdganagan antarabangsa , ekonomi percuakan dan system upah berasaskan Arthasastera; dan Mohd Aiman, Wang d nasal-usulnya: Satu peniliaian semula

#### Kumpulan Matematik dan Fizik ASASI

2 Januari 2014: Dr. Aoinor, Sorotan ruang-masa menurut Hegel

16 Januari 2014: Taufik, Memformalkan realisme/nyataisme dalam fizik

21 Jauari 2014: Taufik, Program pemformalan realisme/neo-realisme

22 Januari 2014: Hazazi, Geometri simlektik sebagai Bahasa indah mekanik klasik

21 Mac 2014: Syamil, Sejarah perkembangan teori haba

## **Kumpulan Falsafah ASASI**

12 April 2014: pertemuan pertama

17 Mei 2014: Pertemuan kedua

21 Jun 2014: Pertemuan ketiga

### **Dlm Negara**

### **PERSIDANGAN MEJA BULAT ‘ISLAM DAN NEUROSAINS’**

Anjuran Institut Kefahaman Islam Malaysia 20 November 2013

Sebanyak enam buah makalah yang dibentangkan di Meja Bulat yang tersebut di atas dan lebih kurang 50 -60 peserta hadir .

Pembentang pertama ialah Dr Wan Suhaimi Wan Abdullah (Profesor Madya di UTM) yang bertajuk ‘Neurosains dan Hakikat Insan Dalam Islam: Penghujahan Ibn Sina, Al-Ghazali dan Al-Baghdali Tentang Kerohanian Jiwa Insan’

Penghujahan beliau banyak tertumpu kepada hakikat Insan dan sedikit perkaitannya dengan neurosains.

Pembentang yang kedua ialah Dr Mohd Zaidi Ismail (IKIM) yang betajuk ‘Nerosains dan Isu-Isu Asas Agama dan Falsafah’

Penghujahan beliau antaranya menyentuk tentang perkaitan tentang ruh , akhlak , akal dan otak dan sedikit tentang neurosains.

Di antara ulasan-ulasan yang diberikan oleh peserta adalah seperti berikut:

Profesor Jafri iaitu seorang profesor di bidang neurosains dari USM telah memberi komen seperti berikut:

Kedua-dua pembentang kertas kerja tidak membuat rujukan yang secukupnya dalam aspek neurosains bagi membolehkan mereka memberi ulasan yang lebih baik dalam hal perkaitannya dengan beberapa

aspek kerohanian yang ditonjokan dalam makalah masing-masing. Dengan rujukan yang amat terhad, kedua-kedua pembentang kertas kerja ini tidak dapat melihat peranan penyelidikan dalam neurosains dalam perspektif keilmuan yang lebih luas. Dengan itu fungsi neurosains dalam penghujahan mereka hanya tertumpu kepada perkara-perkara seperti ‘ amaran ‘ kepada penyelidik Islam yang terlibat dalam penyelidikan dalam neurosains supaya tidak memisahkan aspek rohanai dan jasmani (spiritual dan fizikal). Namun mereka tidak dapat mengaitkan aspek positif neurosains dalam konteks pembangunan intelek umat Islam. Beliau mencadangkan supaya kedua-dua pemakalah itu membuat lebih banyak rujukan dalam aspek neurosains sebelum mengaitkannya dengan aspek-aspek rohani seperti ruh, akal dan aspek-aspek falsafah yang berkaitan dengannya.

Sdr Zahari Othman (penyelidik di bidang PeFikraT=pemberfikiran peringkat tinggi (*HOT = higher-order thinking*), memberi komen seperti berikut:

Kedua-dua pemakalah gagal mengaitkan aspek kerohanian yang ditekankan dalam makalah masing-masing dengan aspek pembangunan intelek yang boleh diadunkan dengan konsep Islam hasil dari penyelidikan yang dibuat di bidang neurosains. Mereka harus mengupas bagaimana gabungan (kombinasi) konsep Islam dari aspek rohani dapat diadunkan dengan hasil penyelidikan neurosains yang berupa sains liat (*hard science*) untuk membentuk masyarakat Islam yang mampu berfikir secara kritis, kreatif dan inovatif untuk menyelesaikan masalah-masalah yang dihadapi oleh umat Islam masa kini. Namun hujah-hujah yang diberikan oleh mereka hanya banyak tertumpu kepada aspek rohani seperti hakikat insan, ruh, akhlak dan akal; tetapi tidak pula dikaitkan bagaimana fungsi akal sebagai anugerah Allah kepada manusia dapat dipupuk melalui sistem pendidikan Islam itu sendiri untuk membentuk masyarakat Islam yang mampu membudayakan pemikiran dalam kehidupan mereka hasil penyelidikan yang dibuat atau potensi hasil penyelidikan dalam bidang neurosains. Kesimpulannya, kedua-dua pemakalah ini tidak mengupas secara seimbang aspek-aspek rohani dengan aspek-aspek kognitif dan sains fizik. Ini seakan menjadi satu trend pemikiran di kalangan ahli-ahli akademik di bidang pengajian Islam di Malaysia dan mungkin di kalangan masyarakat *OIC*. Ini juga memperlihat kepada kita sebabnya sistem pendidikan Islam amat usang dan statik dan tidak membolehkan umat Islam memahami Islam secara mendalam atau secara intelek untuk membolehkan umat Islam bersaing dengan masyarakat Barat. Penekanan melampau terhadap aspek-aspek falsafah yang berkait dengan aspek rohani tidak akan menghasilkan output yang optimum jika perkaitan itu tidak diseimbangkan dengan aspek kognitif di peringkat PeFikraT/*HOT*. Zahari menyarankan supaya diadakan suatu persidangan untuk membincangkan sistem pendidikan Islam di Malaysia supaya dapat dibincangkan dan dirumuskan satu penyelesaian tehadap isu tersebut kerana beliau mendapat kebanyakan penyelidikan yang dibuat oleh mereka di bidang pengajian Islam lebih banyak tertumpu pada aras rohani seperti ruh, akal dan falsafahnya. Namun terdapat satu lompong besar dari segi penyelidikan dalam aspek peberfikiran, khususnya peFikraT/*HOT* bertunjangkan konsep Islam. Mengikut kata Profesor Salam (pemenang Nobel Prize dalam bidang Fizik), terdapat lebih kurang 750 perkataan atau ayat *al-Qur'aan* yang berkait dengan pemberfikiran. Pengabaian dalam aspek pemberfikiran sebenarnya ada kaitan rapat dengan persepsi kebanyakan penyelidik Islam khususnya di bidang pengajian Islam tentang pendidikannya.

Pembentangan ke-3 ialah Profesor IR. Dr Fatimah Ibrahim (Jabatan kejuruteraan Bioperubatan, Fakulti Kejuruteraan, Universiti Malaya bertajuk 'Neurosains dan Islam: Membentuk diri dengan lebih baik'. Beliau mengenangkan satu ujian/eksperimen yang dibuat di makmalnya untuk menguji perkaitan antara kegiatan/aktiviti otak beberapa sampel pelajar yang melakukan solat dengan kesannya terhadap frekuensi otak. Secara ringkasnya, beliau mendapati gelombang otak pelajar-pelajar ini adalah dalam keadaan tenang.

Namun Profesor Yusof (UKM-Pusat Islam Hadar) tidak bersetuju dengan kajian tersebut kerana beliau berpendapat hasil itu mungkin memberi kesimpulan yang tidak tepat khususnya yang berkait dengan akidah. Hujahnya, mereka yang dalam agama lain juga mungkin merasai ketenangan apabila dalam keadaan melakukan ibadat agama masing-masing. Jawapan yang diberikan Profesor Fatimah kepada komen tersebut ialah hasil penyelidikan itu boleh menjadi satu cara berdakwah bagi golongan muda untuk melihat kepentingan solat dari segi hukum Allah dan dari segi saintifik. Ini suatu jawaban yang tidak begitu menjawab kemusykilan Prof. Yusof itu.

Zahari Othman mencadangkan supaya kajiannya dilanjutkan kepada suatu hal untuk melihat bagaimana bentuk gelombang otak pelajar dalam keadaan sedang menyelesaikan masalah matematik

kejuruteraan dengan menggunakan PeFikraT/HOT dan bentuk gelombang otak pelajar dalam keadaan menyelesaikan masalah dalam subjek yang sama dengan menggunakan PeFikrah=Pemberfikiran peringkat rendah (*LOT =Lower-order thinking*) dan mencari gelombang optimum yang akan membolehkan penerapan PeFikraT/HOT secara berkesan kepada pelajar-pelajar tersebut. Dalam aspek solat pula dicadangkan bagaimana bentuk gelombang otak pelajar yang bersolat tanpa memahami makna sepenuhnya dengan gelombang otak pelajar yang mengetahui makna dan mampu menganalisis ayat-ayat yang dibaca secara PeFikraT/HOT , iaitu seperti mampu menganalisis setiap ayat perkataan yang dibaca atau setidak-tidaknya mengukur gelombang otak pelajar yang khusyuk dalam membacaannya.

Pembentang yang keempat ialah Dr Siti Norlina Muhamad (UTM) bertajuk 'Peranan Neurosains Terhadap Pembentukan Tingkahlaku Remaja Dari Perspektif Psikologi Islam'

Sepertilah dengan kedua-dua pembentang makalah yang pertama, beliau gagal mengaitkan akal dengan pemberfikiran dan peranan neurosains dalam meningkatkan fungsi otak sebagai alat untuk berfikir masalah masyarakat khususnya masyarakat Islam. Cadangan penyelesaiannya kepada masalah belia Islam adalah hanya melalui pendekatan PemFikraH/LOT dan tidak menyentuh penyelesaian melalui proses pendidikan Islam yang perlu diperbetulkan seperti kepincangan pendidikan Islam yang diamalkan di rumah, di sekolah , di surau, di masjid , TV , radio dan dalam makalah-makalah yang ditulis melalui surat khabar dan media elektronik. Beliau sepatutnya menyentuh tentang beberapa aspek pendekatan pendidikan Islam seperti yang lazim diamalkan dalam pendidikan *al-Qur'aan* yang tidak membantu umat Islam memahami dan menganalisis *al-Qur'aan* dengan mendalam dan secara intelek. Kertas kerjanya juga tidak dapat dilhat bagaimana potensi kajian-kajian dalam bidang neurosains dan sains kognitif dapat menyelesaikan masalah remaja Islam.

Makalah yang kelima dibentangkan oleh Dr Khairul Nizam bin Ismail (Profesor Madya di USM) yang bertajuk 'Pengaruh Neurosains Ke atas Pendekatan Pendidikan Di Malaysia'

Beliau menyentuh tentang potensi penyelidikan dalam bidang neurosains pada masa kini dan akan datang dalam proses meningkatkan lagi perspektif penyelidikan dalam bidang pendidikan.

Rata-rata peserta merasakan makalah ini baik dari segi penyampaianya sambil merujuk kepada penyelidikan terkini yang dibuat oleh negara-negara maju seperti Amerika Syarikat dalam bidang yang berkaitan dengan neurosains dan pendidikan. Namun beliau harus mengembangkan penyelidikannya kepada aspek PemFikraT/HOT kerana terdapat perkaitan rapat antara PemFikraT/HOT , pendidikan dan neurosains

Pembentang yang keenam ialah Sdr Haji Md Taib bin Mat (Ketua Pegawai Eksekutif/Pengetua Akademi NLP Malaysia)

Beliau menerangkan tentang konsep NLP dan aplikasinya dalam pembinaan modal insan.

Apa dia NLP? Apa ulasan terhadap makalahnya?

Kesimpulannya, persidangan meja bulat ini membolehkan peserta dan pemakalah saling berkongsi idea dalam tajuk-tajuk yang dibincangkan. Namun persidangan ini tidak membawa banyak makna jika sekiranya tiada rumusan dan tindakan dibuat oleh pihak pengajur untuk membawa kembali peserta dan pembentang makalah untuk membincangkan tindakan selanjutnya hasil perkongsian ilmu antara mereka. Saya rasa ini- lah antara pendekatan dalam proses pendidikan Islam yang berpotensi untuk membolehkan masyarakat Islam mendapat manfaat sepenuhnya daripada hasil wacana-wacana intelektual yang berlaku di kalangan cerdik pandai Islam. Saya berpendapat, segala bentuk persidangan yang berlaku di IKIM ini bukan saja perlu menjadi pencetus idea segar tetapi perlulah juga berperanan menterjemahkan idea-idea segar ini dalam bentuk tindakan melalui mekanisma yang tersusun. Di sinilah peranan yang perlu dimainkan oleh IKIM sebagai organiasasi Islam yang terletak di barisan hadapan dalam menyebarkan kefahaman Islam kepada umatnya di Malaysia. Syor ini bertujuan supaya IKIM tidak dilihat hanya berfungsi untuk menghimpun para intelektual Islam untuk berfalsafah sesama sendiri dalam bidang masing-masing tetapi mengabaikan aspek tindakan susulan untuk menterjemahkan ilmu yang ada pada ilmuwan Islam dalam bentuk yang difahami, dihayati demi meningkatkan kualiti hidup bukan saja di segi kerohanian dan kebendaan (material) tetapi juga dari segi tahap pemberfikiran. Bilik-bilik yang ada di IKIM perlu diperguna sepenuhnya untuk mengendalikan seminar/bengkel mingguan dalam membangun pemberfikiran kritis di kalangan

kanak-kanak sekolah, ibubapa dan seluruh lapisan masyarakat. Ini difikirkan perlu kerana kepincangan yang paling ketara di kalangan masyarakat Islam hari ini adalah di segi pengabaian PemFikraT/HOT baik dari aspek pendidikan atau kehidupan harian. Kepincangan pemikiran PemFikraT/HOT ini bukan saja ketara di kalangan masyarakat biasa bahkan di kalangan kebanyakan ahli akademik Islam sendiri dan inilah punca utama sebabnya penyelesaian kepada masalah umat Islam baik dari segi ekonomi, pendidikan dan lain-lain tidak dapat diselesaikan dengan berjaya. Malah isi jurnal-jurnal yang dihasilkan oleh para ahli akademik kita nampaknya tidak mencerminkan adanya dorongan ke arah penyelesaian kepada masalah masyarakat umat Islam.

## LUAR NEGARA

### **Conference Report: The Dynamics of Legal Development in Islamic Countries – Family and Succession Law.**

**International Conference of the Max Planck Research Group "Changes in God's Law" From 17 to 19 October 2013 the Max Planck Research Group "Changes in God's Law – An Inner-Islamic Comparison of Family and Succession Law" hosted under the leadership of [Dr. Nadjma Yassari](#) a conference at the Max Planck Institute for Comparative and International Private Law in Hamburg.**

The event saw 70 scholars and practitioners from 20 countries travel to the Institute to critically examine developments observed in Islamic countries. The goal of the conference was to identify and elaborate on the significance and functions of the various actors involved in the development of law. Following the welcoming address of [Prof. Dr. Jürgen Basedow](#), Managing Director of the MPI, the substance of the conference opened with a keynote address delivered by [Prof. Chibli Mallat](#), University of Utah – Saint Joseph's University Lebanon. In his talk titled "Breaks and Continuities in Middle Eastern Law after the 2011 Revolutions", Mallat considered in particular the developments in family and constitutional law since the Arab Spring. He characterised the general reform efforts of the last century in family law as a "search for equality". This trend is, according to Mallat, now visible also in constitutional law: the provisions of the new constitutions in Egypt, Tunisia, and Yemen intensively address the equality of all citizens independent of gender or religious affiliation.

The second conference day began with a series of lectures on legal developments in selected Islamic countries (Egypt, Tunisia and Pakistan). These talks served as precursors for three parallel workshops conducted during the afternoon session that more closely examined the various actors involved in the development of law – legislators, parties and the judiciary.

*Dr. Nathalie Bernard-Maugiron*, Researcher at the Institut de recherche pour le développement and Co-Director of the Institut d'études de l'Islam et des sociétés du monde musulman in Paris, opened the morning session with a lecture on the interpretation of family law terms by Egyptian judges in divorce proceedings. She stressed the difference between the law as it is written and the "law in action" as created by social reality. This discrepancy is exacerbated by judicial practice as the courts of first instance generally do not adhere to higher court rulings in interpreting statutes and legal terms – an example here being the term darar, i.e. damage, which acts as a basis of divorce for wives.

Subsequently, *Prof. Monia Ben Jémia* of the Université de Cathage in Tunisia reported on the legal and political consequences of the Arab Spring in Tunisia. She critically observed that the positive

strides made toward greater equality of the sexes, as reflected in the earlier codification and reform of the Tunisian Personal Status Law, have been largely halted by the 2011 revolution and the resulting victory of Ennahda. As an example, one can point to the clear priority given to Islam in the most recent draft Constitution. In her view this represents a privileging of men under family law in a manner contrary to the provisions of CEDAW. In terms of solving this problem, Ben Jémia argued that a return to core Islamic beliefs is needed as well as greater democracy and freedom of expression.

The third speaker in the morning session was *Prof. Dr. Shaheen Sardar Ali* from Warwick University. Ali was recently named as one of the 100 most influential women in Pakistan and is also a recipient of the British Muslims Annual Honours achievement plaque. In her talk she made clear the close connection between Pakistani (family) law and its colonial roots. She depicted in detail the origins and sources of legal plurality in Pakistan and described how the British advanced a new form of Islamic law in India and Pakistan, the so-called “Anglo-Muhammadan Law“.

The afternoon of the second day saw the workshops on legislation, party autonomy and the judiciary take centre stage.

The first workshop, focusing on legislation, was led by *Chibli Mallat* and featured short introductory talks from *Dr. Lorenzo Ascanio*, University of Venice (The Moroccan Mudawwana of 2004), [Dr. Nadjma Yassari](#) (The New Iranian Family Protection Act of 2013) and *Nora Alim*, MPI Doctoral Candidate (Reform through Procedural Law in Egypt). First and foremost, the participants addressed the question whether the codification of law was an effective way of addressing the problems and legal concerns of society. It was concluded that while legal statutes were indeed a primary means of social design, the consequence of inadequate legislative vision – as manifested in piecemeal legislation - was typically a disconnect between legislative intention and the legal and social results actually realised. On the other hand, the main advantage of a state codification is the creation of legal clarity and legal certainty. At the same time, it was asked whether the nationalisation of law is not particularly problematic in Islamic countries, where a state formulation of the law could carry the negative consequence of both the spirit of ijtihad and the diversity of Islamic law being lost. The workshop participants observed, furthermore, that the call for the application of Islamic law is always sounded on a selective basis, basically only in respect of family and succession law. Thus the demand to codify Islamic law becomes also a tool through which competing political entities seek legitimisation.

The second workshop, moderated by *Shaheen Sardar Ali*, considered the degree to which parties can shape and advance the law by the exercise of private autonomy. The speakers at this workshop were *Prof. Brian Kritz*, Georgetown University (Alternative Dispute Resolution in Palestine), *Prof. Dr. Annelies Moors*, University of Amsterdam (Dower and Inheritance in Palestine), and [Lena-Maria Möller](#), University of Hamburg – MPI (Extrajudicial Divorce Agreements in the Gulf States). At the centre of the discussion was the question of which prerequisites have to be filled such that the self-regulation of conflicts by private parties corresponds to the needs of society and does not produce further discrimination. The discussion considered various problems such as the social disadvantaging of woman as illustrated by the Palestinian sulha. Thus it was seen that procedure framed by party autonomy can be successful only when there is a balanced power relationship between the parties. Under this prerequisite party autonomy can step in as a corrective for inadequate state rules. It was, in particular, argued that social pressure could make in some instances even the enforcement of statutory laws very difficult .

The third workshop was led by *Prof. Dr. Marie-Claire Foblets*, Director of the Max Planck Institute for Social Anthropology, and addressed the role of the judiciary in the development of the law. Lectures were held by Tunisian Judge *Salma Abida* (The Competence of Tunisian Judges in Family Law), by the Deputy Chief Justice of the Supreme Constitutional Court in Egypt, *Dr. Adel Omar Sherif* (“Practical Experiences of an Egyptian Constitutional Court Judge”) and by [Dr. Imen Gallala-Arndt](#), Postdoctoral Research Fellow at the MPI (Approach of the Courts to Interfaith Marriages). The emphasis of the discussion revolved around the impact of judges’ personal characteristics and views on their rulings. One can, as a matter of course, expect that a judge’s personal views will influence the interpretation of indefinite terms. However, the broad discretion given to judges in the Islamic world results in widely ranging decisions on matters of a similar nature: this explains the quite divergent rulings observed in Tunisia. On the other hand, the broad discretion afforded judges has allowed the judiciary to steadily contribute to the advancement and refinement of the law. This is true, above all, in countries such as Egypt, which has a strong constitutional court, or in Pakistan, whose Supreme Court has pronounced highly innovative rulings.

The findings and conclusions of the individual workshops were presented the next day in a plenary session and opened for discussion.

Publication of the papers presented at the conference is envisioned for 2015.

## **Legitimate and Illegitimate Violence in Modern Islamic Thought**

**2-3 September 2013**

Institute of Arab and Islamic Studies, University of Exeter

Conference Report

Posted by Robert Gleave on Tuesday, September 17, 2013

Sumber: <http://www.livitproject.net/blog/4th-livit-conference-report>

Discussions about the legitimacy of violence within the Muslim intellectual tradition are not *ONLY* about violence – more often than not these discussions reflect broader debates amongst Muslim scholars. An upsurge in traditionalism, or a movement to reform supposedly decadent practices, or an assertion of a particular doctrinal orthodoxy can all be reflected in the precise discussions around whether this or that act of violence is necessary, or obligatory, or legitimate. Our conference in Exeter reflected this, as modern discussions around violence were dominated by a number of more general interlinked themes, which are challenges to the development of Islamic thought in the modern period. Authority was a recurrent issue in papers and discussions: who can call a jihad, and who can end one – and who legitimates a violent act as lawful? Also, the ambivalence of the text was debated regularly – the variety of textual interpretations hints at the inability of texts to control how they are used – to legitimate violence, or to denounce it. The two are linked, of course. The one who has the authority to interpret effectively controls textual meaning, and hence its ability to act as a legitimating factor. The final, frequent discussion point was the link between the intellectual justification of violence and the contextual understanding of that justification. So discussions of violence in the movements of Hizbullah, HAMAS, the Muslim Brotherhood or al-Qa'ida are difficult to assess outside of their context – more importantly, what counts as violence, and whether there are modes of argumentation particular to it, has been a focus of the LIVIT project generally. It came up in the course of the conference regularly.

These are the general themes we discussed – and all the papers touched on one or more of these notions. We are grateful to Ruud Peters and to Bruce Lawrence for providing such marvellous opening lectures on the two days of the conference. Their contribution set the scene for subsequent discussions. And we are grateful also to the many speakers, some of whom had travelled some distance to participate in the workshop. This was the final LIVIT conference – and this time was held in combination with the Islamic Reformulations project – the team will be working on editing the proceedings, which will be, hopefully, in the form of a three volume set, reflecting the early, middle and modern period themes. The conference contributions have raised the central questions of violence

in Islamic thought – and many have provided details and thorough answers. There is still more work to do, but we hope that the work done to date will help make for better informed future discussions.

**Dr. Ashgar Ali Engineer** passed away on May 14, 2013. He was a prominent Indian Muslim scholar and activist, internationally known for his work on liberation theology in Islam. - See more at: <http://islamiccommentary.org/2013/05/irfan-engineer-legacy-of-dr-asghar-ali-engineer-obituary-of-an-activist-scholar/#sthash.fxTFdSDr.dpuf>

**Abdelhamid Ibrahim Sabra**, Professor Emeritus of the History of Arabic Science at Harvard University, passed away on December 18 in Lexington, Massachusetts. Born in 1924 in the Egyptian city of Tanta, he won a scholarship to study philosophy at the nascent Alexandria University. In 1950, the Egyptian government sent him to study at the London School of Economics, where he pursued a doctorate in Philosophy of Science under the supervision of Karl Popper. His dissertation was later published by the Cambridge University Press under the title *Theories of Light from Descartes To Newton*. Sumber: <http://www.muslimheritage.com/article/late-professor-abdelhamid-i-sabra-obituary>

It is with deep sadness and the highest condemnation that I have learned of the news of the passing and martyrdom of **Shaheed Sheikh Muhammad Sa’id Ramadan Al-Bouti** (rehamtullah alaih). Following the outbreak of the Syrian unrest back in March 2011, Bouti criticized anti-regime protesters and foreign backed militants. He urged demonstrators not to follow “calls of unknown sources that want to exploit mosques to incite seditions and chaos in Syria.” Himself from the Sunni school he was a firm advocate for peace between all the groups present in Syria and the wider Muslim world.

In a recent study of the top 500 influential Muslim scholars in the Islamic world by the Jordan-based Royal Islamic Strategic Studies Centre, al-Bouti he was ranked in 27th place.

## **MAKALAH KHAS**

# **Penggunaan Ganti Nama ‘Saya’ dalam Wacana Ilmu Akademik di Malaysia**

Fauzi Naeim Mohamed

Universiti Kuala Lumpur-Malaysian Institute of Information Technology

### **Pendahuluan**

Di dalam penulisan ilmu kesenian, kesusasteraan dan kemanusiaan, penggunaan ganti nama pertama (atau dalam Inggerisnya, *first person perspective*) seperti ‘saya’ amat diraikan – terutama sekali di Barat. Ada banyak sebabnya kenapa ia amat digalakkan terutamanya dalam penulisan falsafah atau kesusasteraan. Ini akan saya senaraikan di sini sebentar lagi. Isu ini saya kemukakan di sini kerana bentuk penggunaannya dalam penulisan akademik di Malaysia, tempat saya belajar dan dilahirkan, tidak begitu keadaannya dan ini menyediakan saya. Bagaimana ini boleh berlaku? Inilah juga yang akan dibicarakan di sini.

### **Ranah Penggunaan “Saya”**

Penggunaan diri pertama ‘saya’ boleh juga diperhatikan dalam suasana lain selain penulisan, seperti filem dan permainan komputer. Di dalam seni filem, terdapat syot filem yang dikenali sebagai *first person view* (secara kasarnya, ‘pandangan diri-pertama’ tapi kadangkala juga kedengaran buah pandangan, BP (POV, *point-of-view*) dan *third person view* (pandangan diri-ketiga). Apabila pandangan kamera berubah dan bertukar menjadi perspektif salah satu wataknya, apabila kita melihat apa yang watak lihat, itu yang kita panggil diri-pertama (*first-person*). Dalam hal ini, kita tidak dapat melihat badan watak yang kita pinjam pandangannya. Pandangan diri-ketiga berlaku apabila kamera menunjukkan badan watak. Ini biasa berlaku dalam syot di Malaysia dan di luar negara.

Penggunaan ganti nama pertama ‘saya’ juga berlaku dalam permainan komputer. Tema biasa yang kedengaran adalah dalam bahasa Inggeris *first-person perspective* atau *third-person perspective*. Permainan komputer 3D seperti Separuh-Hayat (*Half-Life*), yang penuh dengan unsur kekelakan atau elemen futuristik dan makhluk alam lain, adalah bersifatkan ‘pandangan-pertama’ kerana skrin komputer mewakili pandangan kita yang memainkan watak. Walhal, dalam permainan komputer fantasi *Diablo*, kita nampak tubuh badan watak (atau *avatar*) dan ini dipanggil sebagai *third person perspective* atau ‘pandangan-ketiga.’ Saya sebutkan tentang isu pertama dan ketiga ini kerana ia merupakan penggayaan pandangan yang berlaku bukan sahaja dalam penulisan tetapi dalam media lain. Sekiranya ia berlaku, kenapa tidak ia berlaku dalam penulisan akademik? Telah terus terang kita boleh perhatikan bahawa penggunaan ‘saya’ atau ‘aku’ berlaku dalam penulisan kreatif seperti sastera, novel, cerpen, puisi, pantun dan sebagainya. Seharusnya fenomena ini juga boleh turut sama berlaku dalam penulisan akademik di Malaysia ini, yang masih lagi dahagakan penulisan ilmu kemanusiaan yang tinggi nilainya. Apakah hanya penulisan kreatif sahaja dibenarkan menggunakan kata ganti pertama? Adakah hilang martabat penulisan yang menggunakannya? Sudah pasti tidak. Saya amat faham sangat bahawa terdapat larangan serta penapisan tentang penggunaan ‘saya’ yang berlaku secara berleluasa di universiti dan institusi pendidikan di Malaysia. Tidak mengapalah kalau tidak digunakan bahasa ‘aku’ kerana ia mungkin nampak agak kasar. Tidak mengapa juga kalau tidak dipakai ‘patik’ kerana ini menimbulkan kejanggalan tentang orang yang membacanya serta isu lain seperti kejarangan penggunaannya di luar istana.

## Apa yang Berlaku?

Sebenarnya, apa yang berlaku ialah para akademik ini, yang dilarang dan melarang menggunakan kata ganti-nama pertama, mempelajarinya dalam bidang sosial sains dan mungkin terutamanya dalam sains dan teknologi, dengan suatu bentuk ideologi yang menggalakkan penapisan pincang atau *bias* supaya menonjolkan kebolehpercayaan (*reliability*). Bagi mereka, menggunakan frasa ‘saya’ hanya akan menyebabkan berlakunya ilmu yang serong dan ketidakadilan kepada pengarang penulisan akademik tersebut. Kadang-kadang mereka ini tidak sedar bahawa ilmu yang mereka gunakan ini boleh jadi sudah reput dek zaman. Agaknya masa mereka belajar kedoktoran dan sarjana dahulu, inilah ilmu yang ditekan oleh mentor mereka sehingga terbawa-bawa apabila mengajar anak murid mereka. Daripada bersifat terbuka lagi fleksibel, mereka kini jadi begitu tegar atau *rigid* sekali. Apabila kita cakap bahawa di Barat sudah biasa menggunakan bahasa ‘saya,’ mereka akan bidas balik itu ialah Barat, kita orang Malaysia ikut acuan Malaysia; ataupun: Di Barat juga melarang pakai kata ganti pertama ‘saya’! Yang peliknya, ilmu ini mereka ilhamkan daripada Barat! Gaya metodologi kajian, peraturan kualitatif atau kuantitatif ini sebenarnya datang daripada acuan Barat! Malah apabila dilihat balik, ilmu Barat sendiri berupaya menyediakan ruang untuk penggunaan ‘saya’ dalam acuan yang mereka sediakan. Ya, betul: Ada sarjana di barat yang melarangnya, tetapi ada juga yang menggalakkannya. Ini bergantung kepada subjek *apa* yang dikaji. Para sarjana Barat sendiri sedia maklum terdapat jurang dalam penyediaan sistem pendidikan. Yang seni itu ada caranya dan yang kejasmanian atau fizis itu ada pendekatannya. Tidak perlulah dipiawaikan atau *distandardisasikan* kesemuanya. Di Malaysia, kita suka *standardization*!

Kenapakah di Malaysia pembelajaran tentang kesenian dan kesusasteraan mesti melihat dan dilihat dalam ruang kanta metodologi sains semata-mata? Apakah lemahnya tradisi dan kesejarahan kesenian itu sendiri, sehingga ia terpaksa pergi meminjam penggayaan metodologi sains? Apakah dengan menggunakan kata ganti-nama ketiga seperti ‘penulis’ atau ‘pengarang’ atau ‘pengkaji’ maka dengan ini kajian yang dilakukan adalah lebih sistematik lagi terukur? Saya amat faham bahawa ini (mungkin) diperlukan dalam kajian sains, tetapi apakah gaya ini begitu hebat sampai mengesankan hingga kepada ilmu kemanusiaan seperti sejarah, catatan, senibina, pendidikan agama dan sebagainya?

Saya beranggapan bahawa terdapat nilai *imperialistik* yang berlaku dalam penulisan akademik di Malaysia. Ia telah menjajah dan tanpa kita sedari, telah menjajah dengan penuh lamanya lagi mendalamnya sehingga kita sendiri tidak tersedar dengan relevansi sistem bahasa penggantian diri. Apakah semuanya perlu diukur? Pemikiran positifisme (*positivism*) yang dibawa oleh Auguste Comte 200 tahun dahulu, yakni pendekatan yang bersetuju meletakkan setiap informasi kajian *perlu* berasal daripada nilai-nilai matematik dan logik seperti telah mencengkam dunia ini kesarjanaan di Malaysia. Hasilnya, nilai intuistik dan introspektif dipinggirkan. Elemen pentahkikan atau ‘penentusan’ (*verification*) menjadi pokok utama dalam pengumpulan data. Kita kena faham bahawa metodologi sains melibatkan satu bentuk pendekatan yang menyebabkan perlunya ada objektif yang bukan sahaja boleh diukur dengan keputusan kajian tetapi *esti* diukur. Terdapat elemen pembuktian dan kesaksian yang mesti diberikan untuk memberi ukuran yang lebih baik lagi jaya. Soalan yang terbaik ialah: Apakah boleh diukur *semuanya* di dunia ini? Apakah boleh diukur makna ‘kefahaman’? ‘Karisma’? ‘Senilukis’? ‘Keyakinan’? ‘Kepercayaan’? ‘Pandangan’? Apakah boleh dibuktikan kewujudan Tuhan? Bagaimana pula dengan nilai-nilai kemanusiaan yang kita sedia terfaham tetapi mengambil masa dan bahan yang agak merumitkan untuk membuktikannya? Apakah Tuhan boleh dibuktikan? Sekiranya saya percaya kepada Tuhan – dan memang saya percaya kepada Tuhan Allah – apakah bentuk metodologi yang saintifik yang mampu untuk mengukurkan penyataan tersebut? Bagaimanakah tatacara eksperimen yang boleh diperaktiskan? Apakah ada sistem-sistem moden di dunia ini yang boleh membuktikan ‘kepercayaan’ saya atau ‘Allah’? Jawapannya tiada, tetapi semua manusia mempunyai fakulti dalam diri mereka untuk memilih untuk percaya atau tidak. Kalaualah ada sistem yang boleh membuktikan kewujudan Allah, sudah lama para Rasul dan Nabi-Nabi Allah dapat menunjukkan Allah kepada pengikut dan musuh mereka. Apa yang mereka mampu, ialah melalui mukjizat yang di luar logik lagi akal, ialah memamerkan keesaan dan kebesaran Allah; menerusi tongkat Musa, menerusi persembahan Ibrahim yang hidup selamat selepas dibenam dalam api yang menjulang, melalui bah yang hebat yang melanda di zaman Nuh, dan sebagainya.

Sekiranya Tuhan dapat dibuktikan sudah lama para saintis yang mengkaji ilmu biologi, kosmologi, kejuruteraan, kimia, dapat bertemu dengan satu bentuk metodologi, sehingga dapat berhujah, nah! Ini dia Tuhan yang kita cari selama ini! Memandangkan ini terhasil daripada

eksperimen, kita boleh ulangi proses tersebut! Tetapi apakah sepanjang evolusi saintifik yang bergema sekarang ini dapat buktikan? Tiada!

Barangkali saya sudah meleret dan tersasul: Apa kaitan kajian ketuhanan dengan isu penggunaan kata-ganti pertama dalam kajian? Barangkali ada kaitannya; boleh jadi tiada kaitannya. Kalau dicerap dalam suasana keintertekstualan atau intertekstualiti, sebenarnya semuanya ada kaitan. Semuanya ada petanda yang berjangkit antara satu dengan lain, yang mempunyai hubungkaitnya dalam struktur naratif dan di sebalik teks ini, kita berupaya membaca ideologi penulis. Akan tetapi apa yang saya benar-benar maksudkan ialah permasalahan ukuran dalam objektif dan keputusan: Tidak semuanya mampu diukur walaupun kita mampu mengkaji setiap satu. Sekiranya tiada metodologi sains yang berupaya memberikan kesan yang baik terhadap pernyataan pembuktian ketuhanan (dan ilmu kemanusiaan yang subjektif), bukankah ini bermaksud metodologi bersaintifik juga mempunyai kelemahannya. Sekiranya ini berlaku, kenapakah semuanya perlu keesahan atau *validity*? Oh. Saya teringat. Untuk memastikan tiada campurtangan personal oleh individu yang bernama ‘penulis.’ Ini jugalah salah satu penyebabnya kenapa ganti-nama ketiga ‘penulis’ dan ‘pengkaji’ diraikan. Perkara sebegini, barangkali sesuai untuk melakarkan laporan eksperimen pertembungan bahan kimia A dan mineral B dalam makmal, namun, apabila digarapkan dengan permasalahan seperti “Apakah bentuk pengalaman yang dijiwai oleh para jururawat yang bekerja di waktu malam di Institut Jantung Negara (IJN),” kerangka awal tadi tidak dapat menembusi intipati *refleksi* yang amat perlu dalam membicarakan isu pengalaman jururawat ini.

Kesan melarang penggunaan ‘saya’ atau ‘*I*’ dalam penulisan yang seawalnya adalah untuk menjadikan penulisan lebih objektif (konzonnya penulis tidak layak bersuara dan perlu duduk di samping; biarkan data berkata!) boleh mengakibatkan penyekatan kepada wibawa atau autoriti penulis. Ini sebenarnya boleh dilihat sebagai cengkaman politik di alam akademia yang kononnya mahukan bersifat objektif. Apakah benar-benar keobjektifan tercapai; atau cuma memastikan penulisan ‘*kelihan Objektif*?’ Kesannya larangan bahasa ‘saya’ menyebabkan terdapat takanan kepada penggunanya.’ Larangan itu memenculkan mereka yang mahu menulis menggunakan kata ganti-nama diri pertama. Malah, larangan itu mencuri peluang daripada mereka yang mungkin berminat untuk menggunakaninya. Lebih teruk lagi, doktrin itu akan (dan telah) melahirkan generasi demi generasi yang akan meneruskan perjuangan ‘kebenaran’ ini. Saya mengagak kurang daripada 0.01% disertasi pelajar sarjana dan kedoktoran di seluruh Malaysia yang menggunakan ganti-nama pertama ‘saya.’ Ini sebenarnya hipotesis saya, dan belum lagi terukur. Para pembaca yang berminat dengan pernyataan ini (untuk menyangkal atau tidak) digalakkkan dengan segera untuk membuat kajian perihal penggunaan kata ganti diri pertama di universiti Malaysia. Silakan! Topik ini amat menarik dan terbuka untuk semua. Saya tidak terkejut jika kajian dibuat, mungkin angka ini lebih kecil lagi! Boleh jadi peminat pandangan diri-ketiga (*third-person perspective*) tidak sabar-sabar untuk menyerang penulisan ini untuk menundukkan melalui kekuatan angka besar pengguna kata ganti nama ketiga. Dialu-alukan! Satu petikan lagi radikal oleh Gesa Kirsch, seorang sarjana feminis, amat elok direnung dan difikirkan:

...omitting the authorial *I* is a rhetorical strategy that can be (and has been) used to turn opinions into truth, to silence women and other marginalized groups, and to trivialize their concerns.... [T]he uses of an authorial *I* (or lack thereof) have social, moral, and political consequences for which authors bear responsibility (1994: 382).

...meninggalkan kepengarangan ‘saya’ ialah strategi retorik yang boleh (dan telah) digunakan untuk menukar pendapat kepada kebenaran, untuk mendiamkan wanita dan kumpulan terpinggir yang lain, dan untuk meremehkan kepentingan mereka... penggunaan wibawa ‘saya’ (atau ketiadaannya) mempunyai kesan sosial, moral, dan politik yang penulis bertanggungjawab. [terjemahan saya].

Lihat bagaimana pembingiran bahasa ‘saya’ dipetik dalam suasana ideologi di atas; kewujudannya (atau tidak) memberi kesan yang lebih besar sehingga menjerumuskan tanggungjawab penulis sebagai ilmuwan masyarakat. Di sini kita boleh merasai bahawa menggunakan kata ganti-nama ketiga bukanlah bererti ia adalah lebih neutral; ia juga turut memainkan peranan dalam memberi kuasa kepada penulisnya untuk meminggirkannya dan lantas merendahkan pendapat yang berbeza dengannya.

## Kepentingan menggunakan “saya”

Di sini saya coretkan beberapa perkara penting yang dapat mengesankan penulisan apabila menggunakan ‘saya.’

1. Teks akan nampak lagi personal lagi rapat dengan penulis. Ini amat berguna dalam penulisan seperti kes kajian terutama apabila penulis tersebut terlibat secara langsung dalam kajian yang dilakukannya.
2. Menggunakan ‘saya’ menyebabkan kemunculan penulis lebih tegas lagi tertonjol dalam teks. Barangkali, ini yang positifisme cuba elakkan dalam kajian sains dan teknologi, tetapi ‘saya’ amat berguna dalam wacana ilmu falsafah atau perundangan. Ayat seperti “Hujah saya seperti berikut...” lebih menampakkan wibawa penulis daripada ayat “Hujah penulis seperti berikut....” Dengan secara begini, kita seperti berwacana secara langsung dengan khalayak/audien.
3. Apabila menceritakan tentang pengalaman pengkaji, bahasa ‘saya’ memberikan dampak/impak yang jujur dan selalunya kelihatan terlindung dalam seliput bahasa ‘penulis.’ Pembaca akan tersedia maklum bahawa yang menulis itu mempunyai sahksiyah/personaliti dan bukannya suara yang hilang dek kejamakan pihak ketiga. Ini memperkasakan bahawa penulisan itu ‘saya’ yang punya bukannya pihak ketiga.
4. Kadang-kala, kata ganti-nama pertama ‘saya’ memberikan kesan kepada *kedudukan* penulis dalam warkah berkenaan. Gaya itu menguatkan lagi hujah dalam penulisan dan menjernihkan perspektif penulis tersebut.

Dalam wacana falsafah, terdapat penekanan penggunaan bahasa ‘saya’ yang amat berleluasa. Sila lihat penerbitan jurnal atau buku falsafah yang diterbitkan terutamanya daripada Barat. Sila jengokkan nukilan daripada pemikir tersohor seperti Pierre Bourdieu, Søren Kierkegaard, Michel Foucault, Martin Heidegger, Maurice Merleau-Ponty, Hans- Georg Gadamer, Ludwig Wittgenstein, Richard Rorty dan banyak lagi. Mereka begitu ramah menggunakan perkataan ‘saya.’ Sila lihat juga terbitan tesis dan disertasi pelajar di Barat. Tiada masalah pun bagi para pelajar yang ingin menggunakan ‘saya’ terutama dalam subjek ilmu kemanusiaan. Dalam nota yang bertajuk ‘*On writing philosophical essays: Some guidelines*’ oleh Richard G. Graziano (2006), beliau menyebut:

“...it is not only permissible to use the first-person pronoun ‘I’ (or plural ‘we’) in your paper; in some cases, it is essential. Philosophical essays often involve the giving and defending of arguments for positions and claims that you take there to be good reason(s) to accept or not accept.”

...bukan sahaja ia dibenarkan untuk menggunakan ganti-nama ‘saya’ (atau ganti-nama jamak ‘kami’) di dalam artikel anda; dalam sesetengah kes, ia amat penting. Esei-esei falsafah selalunya melibatkan memberi dan mempertahankan hujah untuk posisi dan dakwaan yang anda bawa atas sebab yang betul untuk menerima atau tidak terima [terjemahan saya].

Kita boleh lihat banyaknya penggunaan yang sepadan dengan ‘saya’ dalam karya Wittgenstein seperti *Philosophische Untersuchungen* (Inggeris rasmi: *Philosophical Investigation*, 1953); ini karya ilmu yang amat berpengaruh yang mencambahkan beribu-ribu naskhah ilmu lain di serata dunia. Sekiranya *Philosophische Untersuchungen* ialah buku moden, cuba kita perhatikan pula buku yang lebih lama lagi yang tidak kurang pengaruhnya seperti *Meditations on First Philosophy* (Latin asal: *Meditationes de prima philosophia*, 1641) oleh René Descartes (1596-1650), pemikir dan ahli matematik Perancis. Cuba perhatikan betapa melambaknya perkataan ganti-nama pertama ‘saya’ di hampir setiap muka surat! Ini pemikir yang sama yang terkenal dengan penyataan wujudiah “*Cogito ergo sum*” (Melayu: “Aku fikir, maka aku ada”). Kalau mahu lebih lama lagi, mari kita tolak ke zaman Yunani/Greek klasik, karya Aristoteles/Aristotle (384 SM – 322 SM) yang bertajuk *Metaphysics* (atau dalam bahasa Yunani/Greek asalnya, transliterasi Ruminya, *Ta meta ta fusika*). Sila lihat, sebagai contoh yang teramat kecil, dalam *Metaphysics*, Buku 1, halaman 991b 10-20, di tempat beliau guna

‘λέγω’ (rumi: legō), yang membawa makna ‘saya maksudkan’ atau ‘saya pilih.’ Aristoteles, yang juga dikenali sebagai (*al-mu'allim al-awwal*,’ atau ‘Guru Pertama’) oleh sarjana Islam seperti Al- Farabi, tidak segan menggunakan ‘saya’ apabila perlu, terutama apabila terasa *harusnya* penegasan seorang penulis dalam pernyataan. *Metaphysics* Aristoteles ialah buku ilmu ontologi terkenal yang mempunyai usia yang melebihi 2000 tahun dahulu. Daripada sini sahaja kita dapat perhatikan bahawa penggunaan ‘saya’ dalam teks sememangnya mempunyai sejarah yang panjang lagi besar tradisinya.

Penggunaan sistem metodologi akademik sudah jadi macam satu fenomena yang menyekat ‘siapa’ yang mengutara metodologi berkenaan. Sebab itulah adanya pergerakan intelektual seperti *critical theory* (teori kritis), *poststructuralism* (pasca-strukturalisme) dan *postmodernism* (pasca-modernisme) yang mahu merayakan bukan sahaja ‘siapa-itu-penulis’ tetapi juga ‘siapa-itu-pembaca’ dalam teks. Tidak kira siapa penulis tersebut, melalui pembacaan dan analisis kritis, dapat dicium baunya kelas dan ideologi penulis. Malah, dalam eseи *The Death of the Author* (1968) oleh pemikir Perancis bernama Roland Barthes, beliau mahu meraikan pula Sang Pembaca; golongan yang bagi beliau penyebab utama kenapa teks menjadi begitu aktif dalam memberikan makna yang pelbagai. Sudah pasti kebergantungan kepelbagaiannya makna teks merujuk sejauh mana pengkayaan sejarah pembacaan kita dan budaya sekeliling kita.

Dalam ilmu falsafah, terdapat cabang ilmu yang bergelar *fenomenologi*. Ini satu bidang ilmu yang mengkaji struktur kesedaran dan kefahaman yang dialami daripada sudut perspektif orang-pertama. Ia mengkaji isu kehsaratan kita kepada objek yang kita alami, dan bagaimana ia terzahir dalam pengamatan kita. Ini satu kajian yang *amat* mementingkan pengalaman pengkaji. Justeru, penggunaan ‘saya’ di sini adalah jauh lagi penting daripada bahasa ‘penulis’ kerana fenomenologi menitikberatkan ‘siapa’ yang bercakap. Menggunakan kata ganti-nama ketiga ‘penulis’ akan mengekang pengkaji daripada lebih rapat dengan objek yang dicerapkannya. Fenomenologi ini satu cabang ilmu falsafah *kontinental* (yang bermula di Eropah), terutamanya di Jerman dan kemudiannya di Perancis. Ilmu falsafah kontinental ini, yang bermula lebih kurang kurun 19 hingga 20, sebenarnya ialah satu pergerakan yang bergerak melawan arus dengan falsafah *analitika* (yang banyak berasal daripada negara berbahasa Inggeris seperti England, Amerika, Kanada dan Australia). Walaupun kedua-dua pergerakan intelektual ini berbeza dari segi asas pendebatannya, masing-masing seja sekata menggalakkan penggunaan ganti-nama pertama. Tidak jadi masalah. Yang masalahnya cumalah subjek, cara dan gaya mengumpulkan dan menghujahkan masalah. Secara amnya, falsafah kontinental ini amat mencurigai nilai-nilai *saintisme*; satu bentuk pandangan yang menghujahkan bahwasanya hanyalah pendekatan sains kesemulajadian *sahaja* paling terjitu dalam memahami fenomena.

## Sangkalan Tradisi Format Rujukan

Kadang-kala, kalau ditanya kenapa bahasa ‘saya’ tidak dibenarkan, para sarjana tertentu ini menjawab bukan perihal mereka mahu bagi atau tidak, tetapi format rujukan tidak membenarkannya. Apakah benar ini berlaku? Mari kita lihat ke dalam format kajian, yakni sistem rujukan akademik. Mari kita perhatikan sejenak sistem APA (*American Psychological Association*) yang biasa dan agak popular dipakai oleh para akademik di institusi tinggi Malaysia apabila mereka menulis kajian mereka. Dalam situs *Purdue Online Writing Lab*, dalam segmen *APA Stylistics: Basics*, ini yang diberitahu:

*When writing in APA Style, you can use the first person point of view when discussing your research steps (“I studied ...”) and when referring to yourself and your co-authors (“We examined the literature ...”).*

(Dipetik terus daripada <http://owl.english.purdue.edu/owl/resource/560/15/>)

Apabila menulis di dalam gaya *APA*, anda boleh menggunakan ganti-nama pertama apabila membincangkan langkah kajian anda (“Saya mengkaji ...”) dan apabila merujuk kepada diri anda dan penulis-bersama (“Kami mendapati kesusasteraan ...”).

[Dipetik daripada <http://owl.english.purdue.edu/owl/resource/560/15/>. Terjemahan oleh saya].

Ini jelas menunjukkan kepada para penulis akademik bahawa tiada apa masalahnya menggunakan ganti-nama pertama ‘saya’ atau ‘I.’ Format *APA* amat menggalakkan suara aktif (*active voice*). Saya jangkakan bukanlah semua jabatan di semua universiti di Malaysia tidak membenarkan penggunaan ‘saya’; sebagai contoh, di jabatan kajian Inggeris di beberapa universiti, *pasti* ada beberapa pensyarah dan profesor yang tiada masalah dan bersifat terbuka dalam membenarkan para pelajar di bawah mereka menggunakan ‘I.’ Barangkali mereka ini telah terdedah dengan isu-isu teori kritis, Marxisme, feminism, pasca-kolonialisme, dan bacaan mereka lantas rapat dengan perkembangan kesarjanaan terkini yang berlaku di Barat. Saya juga yakin ada juga ahli akademik di jabatan dan pusat lain yang mempunyai pemikiran yang serupa yang amat terbuka dalam suasana sebegini. Namun, mereka ini, saya perhatikan secara sekilas, amat segelintir.

Adakah *benar* para saintis tidak digalakkan menggunakan suara aktif (*active voice*) di dalam penulisan jurnal akademik? Di dalam jurnal terbitan *Nature*, antara terbitan saintifik yang tersohor sekali di UK dengan 3 juta pembaca dalam talian (*online*), penggunaan suara aktif amat digalakkan. Mari kita petik daripada laman situsnya:

*Nature journals prefer authors to write in the active voice (“we performed the experiment...”) as experience has shown that readers find concepts and results to be conveyed more clearly if written directly.*

([http://www.nature.com/authors/author\\_resources/how\\_write.html](http://www.nature.com/authors/author_resources/how_write.html))

Jurnal *Nature* lebih gemar penulis untuk menulis di dalam suara aktif (“kami melaksanakan eksperimen...”) kerana pengalaman menunjukkan bahawa pembaca mendapati konsep dan keputusan disampaikan dengan lebih jelas sekiranya ditulis secara langsung.

[Dipetik daripada [http://www.nature.com/authors/author\\_resources/how\\_write.html](http://www.nature.com/authors/author_resources/how_write.html). Terjemahan oleh saya].

Jurnal-jurnal *Nature* mempunyai keasanaan (*ranking*) yang tinggi dengan pemarkahan faktor indeks (diukur dalam Thomson *ISI*) sebanyak 42.351 pada tahun 2013. Nombor-nombor *citation* sebegini sememangnya amat memberhikan para saintis dan teknologis. Sekiranya jurnal sebegini tiada masalah dengan suara aktif, kenapa pula suara aktif masih dikongkong di universiti di Malaysia? Dalam bidang penulisan falsafah dan sastera Barat kita sedia maklum tiada masalah dalam penyebutan ‘saya’ atau ‘I.’ Bagaimana pula kajian falsafah dan sastera di Malaysia? Kenapa tidak diraikan *jiwa* ganti-nama ‘saya’? Kita boleh perhatikan juga cadangan penggunaan ganti-nama pertama oleh pusat penulisan *University of North Carolina at Chapel Hill*, America dalam nota bertajuk “*Should I use ‘I’?*” supaya para pembaca dapat membaca halaman tersebut dengan lebih mudah lagi tepat:

*Although there are certainly some instructors who think that these rules should be followed (so it is a good idea to ask directly), many instructors in all kinds of fields are finding reason to depart from these rules. Avoiding “I” can lead to awkwardness and vagueness, whereas using it in your writing can improve style and clarity. Using personal experience, when relevant, can add concreteness and even authority to writing that might otherwise be vague and impersonal.*

(Sumber: <http://writingcenter.unc.edu/handouts/should-i-use-i/>).

Walaupun pastinya terdapat beberapa pengajar yang memikirkan peraturan sebegini sepatutnya diikuti (ia adalah lebih baik untuk bertanya terus), ramai pengajar di dalam pelbagai bidang mencari sebab untuk lari daripada peraturan ini. Mengelakkan ‘saya’ boleh membawa kepada kejanggalan dan kesamaran, manakala menggunakan di dalam penulisan anda akan meningkatkan gaya dan kejelasan. Menggunakan pengalaman peribadi, apabila berkaitan, akan menambahkan kekuatan dan malah wibawa terhadap penulisan yang mungkin samar dan tidak mesra [Sumber: <http://writingcenter.unc.edu/handouts/should-i-use-i/>. Terjemahan saya].

## Pandangan Pinggiran

Pernah saya bincangkan isu kata ganti-nama pertama ini dengan Dr. Shaharir Mohamad Zain (Felo Penyelidik Kanan Universiti Malaya, juga bekas Profesor Matematik di Universiti Kebangsaan Malaysia). Saya hujahkan tentang pentingnya penggunaan kata ganti-nama pertama ‘saya’ ini dengan beliau walaupun beliau agak keberatan dengan penggunaannya. Walaupun sedemikian, jawapan beliau tentang isu ini agak menarik dan wajar diputarkan di sini. Katanya, isunya bukanlah pasal konvensyen akademik biasa atau ilusi ketelusan kajian tetapi penggunaan bahasa ‘saya’ baginya nampak lagi... gah, seperti membesar diri. Beliau memilih ganti-nama pertama jamak eksklusif, ‘kami,’ bagi mewakili ‘penulis’ kerana ganti nama ini diangapnya lebih lembut – merendahkan diri – dan sesuai dengan jiwa pembaca bahasa Melayu di Malaysia dan Indonesia. Elok juga ada alternatif sebegini. Saya tiada masalah dengan ‘kami’ walaupun nampaknya menjadikan jamak (*plural*) kepada penulis tunggal. Mungkin beliau menjawab, bahasa Melayu tidak begitu patuh dengan kejamakan dan ketunggalan, lebih-lebih lagi apabila dibandingkan dengan kesopanan dan budi pekerti. Ada betulnya sekira dilihat dalam konteks *kesopanan*, namun sebegitu, saya kira perkataan ‘saya’ juga boleh bersifat sopan; ia bergantung kepada tempat perkataan itu berada dalam pernyataan atau perenggan di mana ia berada.

Kalau dibiasakan penggunaannya dalam penulisan akademik, saya yakin perkataan ‘saya’ menjadi biasa dan tidak akan menimbulkan polemik kejanggalan atau kesopanan itu. Antara ahli akademik lain yang saya kenalpasti meraikan kata ganti nama ‘kami’ termasuklah Dr. Mohammad Alinor bin Abdul Kadir (Akademi Kajian Ketamadunan) dan Dr. Ruzaika Omar Basaree (Felo Penyelidik Pusat Budaya UM). Barangkali ada lagi ahli akademik lain yang menggunakan ‘kami’ bagi mewakili perseorangan, namun saya jangkakan bilangan ini masih lagi kecil.

Bukanlah saya mahukan setiap perenggan dalam penerbitan di Malaysia penuh dengan penggunaan kata ganti-nama pertama ‘saya,’ tetapi cukuplah dengan pengiktirafan bahawa tiada masalah dalam penggunaan ‘saya’ terutamanya dalam penerbitan jurnal akademik, laporan atau disertasi di Malaysia sama ada di dalam IPTA atau IPTS. Kadang-kala, apabila terlalu banyak sangat ‘saya’ boleh merosakkan pula kepada pernyataan pengkaji. Penggunaannya kena berpada-pada. Sama macam makan – ia memberikan tenaga namun jika lau terlebih nanti padah pula kepada kesihatan diri. Daripada dirisaukan sangat tentang penggunaan ‘saya,’ bukankah lebih baik lagi enak dilihat subjek di mana perkataan ‘saya’ ini timbul? Saya amat yakin bahawa lokasinya dalam perenggan dan tajuk biasanya tidak menimbulkan masalah; sebab masalah yang selalu timbul, yang banyak memeningkan pensyarah atau akademik, ialah *pengutaraan kandungan keseluruhan makalah atau buku tersebut*. Bab ini, saya kira, masalah universal!
