Petua transliterasi/transkripsi Arab-Rumi keluaran ASASI ini yang berbeza daripada Petua-Petua Popular yang Lain seperti LC (*Library of Congress*), DBP (Dewan Bahasa dan Pustaka), dan IYL (Individu/Institusi yang Lain)

Huruf Arab	LC	DBP/IYL	ASASI
(‘ain)	‘	‘ / ‘	‘
(tdo)	ત	ત/ત	td
(ta marbutdaht)	t atau h	ત	ht
(ha nipis)	h	હ/હ	h
(ho tebal)	h	હ	hd
(zai nipis)	dh	ધ/સ/ત્સ	dz
	th	થ/સ્સ	th
(za tebal)	z	ઝ	zh
(syain)	sh	શ	sy
(dho tebal)	d	ધ	dh
(sho tebal)	શ	શ/શ્ચ	sh

harkaht atau sabdu/dengung ditandakan dgn ulangan huruf berkenaan.  
Contohnya *al-Quraan* menunjukkan bunyi a itu dipanjangkan dua harkaht.  
*tamattu’* menunjukkan bunyi t itu disabdukan.

### Imbauan kepada Penulis

ASASAINS sentiasa **menghalu-alukan** sebarang bentuk penulisan atau berita yang mengandungi perutusan sains Islam (mengikut selera atau tafsiran masing-masing) untuk dimuatkan ke dalam warkah berita ini.

%%%%%

``I like Islam, it is a consistent idea of religion and open-minded``

(**Kurt Godel** (seorang ahli matematik agung Eropah abad ke-20) spt yg dipetik oleh Hoo Wang dlm buku beliau ``*A Logical Journey: From Godel to Philosophy*``, terbitan The MIT Press. 1996. Cambridge Massachusetts)

# Maklumat ASASI

#### **Status Keanggotaan ASASI (seperti pada 31 Disember 2012):**

Anggota Kehormat: Abdullah bin Salleh, Tan Sri mantan KPE Petronas & KSU Negara (Pulang ke RMA, 2005)

Ainuddin bin Abdul Wahid, Tan Sri, mantan NC UTM (mulai 1980-an)  
Mohd Ariffin bin Hj. Suhaimi, Dato' Dr., mantan Prof. & TRektor UIAM (mulai 1990-an)

Osman bin Bakar , Prof. Dr. , mantan Pres. ASASI, mantan TNC,UM; mantan Kerusi Pengajian Islam Univ. George Washington, AS; Tim. KPE IAIS (mulai 2009)

Sayed Muhammad Naguib Al-Attas, Prof. Dr. mantan

Pengarah IBKKM (kini ATMA, UKM), mantan Pengarah ISTAC (Anggota kehormat pertama, mulai 1980-an).

Tg. Mohd Azzman Shariffadeen b. Tg. Ibrahim, Ph.D, Dato', FASM, mantan Dekan Fakulti Kejuruteraan Universiti Malaya dan Pengurus & Ketua Eksekutif MIMOS (mulai 2009)

**Anggota Biasa:** tiada maklumat

**Anggota Seumur Hidup:** tiada maklumat

**Anggota Kehormat:** Tiada Maklumat

## Pengenalan ASASI

Akademi Sains Islam Malaysia atau lebih dikenali sebagai ASASI ditubuhkan pada 1977 oleh sekumpulan ahli sains dan teknologi muslim Malaysia. Pada mulanya Akademi ini memang tidak ditujukan kepada ahli sains sosial atau kemanusiaan, tetapi mulai lebih kurang sedasawarsa penubuhannya, perlombagaannya dipinda supaya semua ilmuwan dalam bidang apa pun dapat menganggotainya sesuai dengan makna sains mengikut perspektif Islam. Kini anggota ASASI menjangkau lebih daripada 300 orang ahli (kebanyakannya ahli akademik dan peiktisasi) dalam pelbagai bidang ilmu. Sesiapa yang memiliki ijazah dalam apa juga bidang layak memohon menjadi ahli biasa ASASI. Selainnya bolehlah memohon untuk menjadi ‘ahli bersekutu’. ASASI juga menawarkan kepada seseorang individu menjadi ahlinya bertaraf Anggota Kehormat jika seseorang rakyat Malaysia Muslim itu dianggap banyak memberi sumbangan pembangunan sains atau teknologi kepada umat Muslim di Malaysia.

## *Tujuan*

1. Untuk menghidupkan semula tradisi sains berasaskan al-Quran, iaitu satu bentuk kajian tentang alam tabii atau fenomenon dan telatah yang tidak memisahkannya daripada prinsip-prinsip Islam.
  2. Untuk memperkenalkan dan mendokong konsep dan falsafah sains Islam bersama-sama dengan etika Islam dalam kegiatan sains dan penyelidikan.
  3. Untuk menggalakkan kajian sains di kalangan masyarakat dan menjadikan al-Quran sebagai satu sumber inspirasi, hidayah dan rujukan dalam kegiatan sains.
  4. Untuk berpegang teguh kepada keinginan dan tekad bagi mengembalikan bahasa Arab, sesuai dengan peranannya sebagai bahasa al-Quran, kepada kedudukannya yang asal dan betul sebagai bahasa sains dalam dunia Islam.
  5. Untuk melakukan usaha memadu, mengamir atau mengintegrasikan dan menggembungkan para ilmuwan muslim ke arah membangun dan memajukan masyarakat Islam terutamanya dalam S & T.

- Untuk bekerjasama dengan organisasi-organisasi lain, dalam dan luar negara. Bagi memastikan kegunaan ilmu sebagai alat untuk mencapai kebahagian di dunia dan akhirat dan bukan untuk pemusnahan insan.

ASASI menerbitkan warkah berita dwitahunannya berjudul ASASAINS sejak penubuhannya, dan sejak 1990 ASASI juga menerbitkan jurnal ilmiah dwitahuannya berjudul Kesturi. ASASI juga menerbitkan buku-buku ilmiah dan pascasidang kepada simposium dan sebagainya anjuran ASASI dari masa ke masa, terutamanya tentang pengislaman ilmu atau isu-isu semasa mengikut perspektif Islam seperti buku-buku berikut:

Shaharir b.M.Z. 2011. *Kritikan Teori Kenisbian dan Teori Qusantum*. Shah Alam: ASASI

# Yusof M.Hj. O. et al. & ASASI. 2000. *Siri Wacana Sejarah dan Falsafah Sains* 8. Kuala Lumpur: DBP

- ◆ Shaharir b. M. Z. 2000. *Pengenalan Sejarah dan Falsafah Sains*, Suntingan Kedua. (snt. Pertama: 1987). Bangi: UKM.
  - ◆ Mabud S.A. 1991. *Theory of Evolution : an Assessment from the Islamic Point of View*.
  - ◆ Osman b. B. (Pty.). 1989. *Pemikiran Sains Masa Kini*. Pascasidang.
- \*\* Osman b. B. 1987. *Al-Farabi: Life, Works and Significance*. Terj-nya terbitan Dewan Bahasa dan Pustaka, 1991 [Al-Farabi, kehidupan, hasil karyanya dan peri penting tokoh]
- ◆ al-Attas S.M.N. 1981. *A positive Aspect of Tasawwuf. A Preliminary Thought*. ASASI
  - ◆ Sulaiman b. N. 1978. *Teori Evolusi. Satu Fakta atau Hipotesis?*
  - ◆ Bucaille M. 1978. *Qur'an and Modern Science*.

MENTEOLOGIKAN DEMOKRASI: PEMIKIRAN NURCHOLISH MADJID TENTANG ISLAM DAN DEMOKRASI. H.Z., Syarafuddin

He used apologetic approach to engage liberal democracy inherence with Islam. His apologetic approach affirms that Islam is universal in nature that equals with democracy principals and secularization that means separating religion and politic. Nevertheless, his views on Islam and democracy have a blind spot. This article will argue that he has failed to pull both Islam and democracy as universality rather his concept of universalism has trapped to its particularity. In addition his view on secularism is problematic if it collides to the current phenomena of democratic ideal principle on political plurality.

Power, Tradition and Challenge: The Resilience of the Elite Shi'ite Families of Lebanon. Harel Chorev  
Democracy in Modern Islamic Thought. Nazek Jawad

Despite the hostility they exhibit towards each other, almost all Arab secularist and radical Islamists agree that democracy and Islam are irreconcilable, and that belief in one inevitably precludes belief in the other. In this article I will focus on the beliefs of the Islamist Rachid Ghannouchi regarding this issue. First I will examine his notion of how democracy can be achieved in an Islamic state. I will then explore issues of conflict that have arisen between traditional and modern Islamist thinking relating to the compatibility of democracy and Islam. Finally I will focus on two variables that are claimed to be major obstacles to liberal democracy in Muslim states: secularism and modernisation.

Eurabia Comes to Norway. Sindre Bangstad

Andres Behring Breivik, the perpetrator of the 22/7/11 terrorist attacks in Norway, was profoundly inspired by what has become known as the Eurabia genre. A popular transnational genre found in both film and literature, the Eurabia genre is central to understanding the worldviews of extreme right-wing “counter-jihadists.” It alleges that European Muslims want to establish continent-wide Islamic domination in the form of an Islamic state or a caliphate, using higher fertility rates and immigration as their main means of achieving this. I use the insights of critical discourse analysis in order to analyse some central

contributions to this profoundly Islamophobic genre and its popularization and political mainstreaming in Norway in the past decade.

Issa Khan, Noor Naemah Abdul Rahman, Mohd Yakub Zulkifli Mohd Yusoff, Md. Faruk Abdullah

In Defence of Bada'. Reza Berenjkar

Bada', which may be loosely translated as 'the ability of God to change His decree', is a characteristically Shi'a doctrine that, historically, has been subject to severe critique outside Shi'a circles.

2013, 6(4):

The Malaysian Shi'a: A Preliminary Study of Their History, Oppression, and Denied Rights. Mohd Faizal Musa

Malay cultural practices show evidence of the influence of Shi'ism; this suggests a stronger historical presence of Shi'ism than is commonly acknowledged. Applying the oral historiography framework of Jan Vansina, this study unearths evidence of Shi'ism in Malaysia going back centuries through anonymous interviews. It also highlights the contemporary lack of religious freedom that the Shi'a minority in Malaysia faces, particularly after the 2010 raid on the Hauzah Ar Ridha Alaihissalam community centre near Kuala Lumpur. Ultimately, this study hopes to put the situation of the Shi'a in Malaysia today into a larger historical context and refute the argument that Shi'ism is a recent arrival to the Malay archipelago.

A Study on the Notions of 'Ali ibn Abi Talib in Malay Popular Culture. Majid Daneshgar, Faisal Bin Ahmad Shah, Zulkifli Bin Mohd Yusoff, Nurhanisah Senin, Siti Fairuz Ramelan, Mohd Roslan Bin Mohd Nor

This article will explore the special position given to 'Ali ibn Abi Talib in traditional Malay martial arts as well as marriage customs, and will show how ideas generated in other parts of the Islamic world – such as the futuwwah tradition – evolved into uniquely Malay forms of religious and cultural expression which transcend sectarian bounds.

***Sophia. International Jour. of Philosophy and Tradition***

*Sophia* has provided a forum for discussions in philosophy and religion, focusing on the interstices between metaphysics and theological thinking. The discussions encompass the wider ambience of the sciences ('natural' philosophy and human/social sciences), ethical and moral concerns in the public sphere, critical feminist theology and cross-cultural perspectives. *Sophia*'s cross-cultural and cross-frontier approach is reflected not only in the international composition of its editorial board, but also in its consideration of analytic, continental, Asian and indigenous responses to issues and developments in the field of philosophy of religion.

2013, 52(3):

### **Arabic Scs & Philos.** – dwibahasa: Perancis dan Inggeris

An international journal devoted to the Arabic sciences, mathematics and philosophy in the world of Islam between the eighth and eighteenth centuries, in a cross-cultural context. In 2009, the journal extended its scope to include important papers **on scientific modernization from the nineteenth century in the Islamic world.** Together with original studies on the history of all these fields, *ASP* also offers work on the inter-relations between Arabic and Greek, Indian, Chinese, Latin, Byzantine, Syriac and Hebrew sciences and philosophy. Casting new light on the growth of these disciplines, as well as on the social and ideological context in which this growth took place, *ASP* is essential reading for those interested in these areas.

**The Sociology of Islam and Muslim Societies Newsletter: Winter 2011**

The major aim of this network is to study and understand the sociological aspects of Islam and Muslim Societies. In this context, the concept of Sociology of Islam has been borrowed from Dr. Ali Shariati, whereas the concept of Muslim Societies was borrowed from Ernest Gellner's argument. We believe that these two scholars represent core aspects of current changes in Islam. Both scholars rejected the Orientalist understanding of Islam and Muslims. Therefore, we take a similar approach in this network.

measuring group fitness in a biological hierarchy: an axiomatic social choice approach. *Walter Bossert 1, Chloe X. Qia and John A. Weymark*

the futile search for true utility. *Roberto Fumagalli*

In traditional decision theory, utility is regarded as a mathematical representation of preferences to be inferred from agents' choices. In the recent literature at the interface between economics, psychology and neuroscience, several authors argue that economists could develop more predictive and explanatory models by incorporating insights concerning individuals' hedonic experiences. Some go as far as to contend that utility is literally computed by specific neural areas and urge economists to complement or substitute their notion of utility with some neuro-psychological construct. In this paper, I distinguish three notions of utility that are frequently mentioned in debates about decision theory and examine some critical issues regarding their definition and measurability. Moreover, I provide various empirical and conceptual reasons to doubt that economists should base decision theoretic analyses on some neuro-psychological notion of utility.

## Makalah Menarik

Linking Science to Culture: Challenge to Psychologists. Kwang-Kuo Hwang. Social Epistemology. A Journal of Knowledge, Culture and Policy 2013, 27(1)

This article argues that constructing scientific microworlds for linking science to cultures of lifeworlds constitutes the problematic situation for not only indigenous psychologists in particular, but also psychologists in general. The problematic situation calls for a scientific revolution in psychology from the perspective of Western philosophy of science.

Experimental philosophy of economics. Michiru Nagatsu. *Economics and Philosophy* 2013, 29(1)

I argue that a new empirical approach called experimental philosophy of science is a promising approach to advance the philosophy of economics. In particular, I discuss two debates in the field, the neuroeconomics controversy and the commonsensical realism debate, and suggest how experimental and survey techniques can generate data that will inform these debates. Some of the likely objections from philosophers and economists are addressed, and possible ways of operationalizing different preference concepts are illustrated.

Secularism and the cultures of nineteenth-century scientific naturalism. M. Rectenwald. *The British Jour. for the History of Sc.* 2013, 46(2)

While historians have noted the importance of evolutionary thought for freethinking radicals from the 1840s, and others have traced the popularization of agnosticism and Darwinian evolution by later Victorian freethinkers, insufficient attention has been paid to mid-century Secularism as constitutive of the cultural and intellectual environment necessary for the promotion and relative success of scientific naturalism. I argue that Secularism was a significant source for the emerging new creed of scientific naturalism in the mid-nineteenth century. Not only did early Secularism help clear the way by fighting battles with the state and religious interlocutors, but it also served as a source for what Huxley, almost twenty years later, termed ‘agnosticism’.

The goals of this article are: 1) to characterize the classical Ibādī theological literature dealing with the atomistic theory of substance and accident; 2) to review the texts of Ibādī scholars as they argued and engaged with other Islamic theological schools: pre-Bahshamiyya Mu'tazilites (Abū Hāshim al-Jubbā'i, d. 321/933) and Ash'arites (Abū al-Hasan al-Ash'arī, d. 324/936), in relation to the atomistic theory of substance and accident during the 3rd/9th century; 3) to survey the wide range of opinions among the early Ibādī theologians, and to examine the specific sources and themes that may have influenced this multifarious school of thought. Likewise, it is the aim of this article to demonstrate the common features in the Ibādī approach to producing theological literature during the formation of Islamic theology, and to explore how these early theologians may have gained access to cosmological themes that predate Islam.

# Laporan Seminar Sains KeIslamaman dan Keperibumian 2013

## DALAM NEGARA

### A Report on *Philosophy Seminar 2*

Date: 16/3/2013

Place: Pusat Permata Pintar Negara, UKM

Organiser: ASASI (Malaysian Science Islamic Academic)

Objectives: The objectives of the seminar is to provide an avenue for future scholars to exercise their writing skill, to practice paper presentation, and to discuss their research findings.

#### **INTRODUCTION**

There were 5 presenters:

Fauzi Naeim Mohamed. *Heidegger's thinking on the artistry.*

Mohammad Alinor bin Abdul Kadir. *Epistemological criticism and it's nowadays debate.*

Mohammad Safaei. *Revisionism: Expansion of Contemporaneity.*

Syamil Shakir. *The critic comparison about technique between Martin Heidegger, Oswald Spengler and Jacques Ellul.*

The seminar started at 9am with the briefing about the seminar by the Dr. Mohammad Alinor bin Abdul Kadir, the chairman for the seminar.

The seminar starts with the presentation of paper entitled "*The critic comparison about technique between Martin Heidegger, Oswald Spengler and Jacques Ellul*" by Mr. Syamil Shakir from Universiti Tenaga Nasional (UNITEN). Then continued by the presentation of the paper with title "*Heidegger's thinking on the artistry*" by Mr. Fauzi Naeim Mohamed from the Universiti Kuala Lumpur (UNIKL). Just before the lunch break, there was a presenter (without a full paper) named Mr. Hamidi Razak who discussed the mathematics in the banking system. Then, there was a lunch break

for about one hour and the seminar were continued at 2 pm. The next paper was presented by Mr. Mohammad Safaei from Universiti Kebangsaan Malaysia (UKM) which entitled “*Revisionism: Expansion of Contemporaneity*.” The last paper was presented by Dr. Mohammad Alinor bin Abdul Kadir entitled “*Epistemological criticism and it’s nowadays debate*.” The seminar was finished at about 5.00 pm with a final refreshment. The following are my review on each of the papers presented at the Seminar.

**THE CRITIC COMPARISON ABOUT TECHNIQUE BETWEEN MARTIN HEIDEGGER, OSWALD SPENGLER AND JACQUES ELLUL BY MR. SYAMIL SHAKIR (UNITEN).**

This paper contain 5 subtopics where he discussed on what is technique and technology, overall summary of the writings of the subjects by Martin Heidegger, Oswald Spengler and Jacques Ellul, optimism vs. Pessimism and “*tentuisme*” (determinism) vs. “*taktentuisme*” (nondeterminism) and ended up with the discussion on the usage of technology.

In the discussion of what is meant by technique and technology, Mr. Syamil did explain the origin of the word technique and technology where both words were originally from German, *technik* and *technologie* respectively. The “*technologie*” is high level than “*technik*”, the later is much more related to an engineering. For example, the term “*electrotechnik*” is the electrical engineering. Unfortunately, the English translation of the term “teknik” is technology.

The German philosophical reflection towards the technology was begun with the presentation of the technique subject and not the technology itself. Therefore, the Heidegger’s and Spengler’s critics are actually towards technique and not technology. Meanwhile, in the France tradition, another alternative for the technique failed to be traced and so the writer assumed that the term technique has the same meaning as the “*technologie*” in German.

On the second subtopic the discussion on the overall summary of the writings by Martin Heidegger, Oswald Spengler and Jacques Ellul was based only one book by Heidegger, Spengler and Ellul respectively. Based on “*Die Frage nach der Technik* (The Questions Concerning Technology)” written by Heidegger, he divide the technology into two concepts shown by the technology of windmill. The windmill is the best “nature friend” technology as it does not involve the obvious destruction of nature. On the other hand, most of the present technology do involve in the transformation of the nature. In other words, the present technology is the key to nowadays ecology crisis. Heidegger does not concentrate on the destruction produced by technology specifically. For him, the real danger of technology is how the technology reveal something. In order to break free from the concept of technique, Heidegger urged technology should not be seen from the purely instrumental view.

Meanwhile, Spengler defined technique as tactics to be applied in order to survive in life. For him, even animals also are considered in the same category. Spengler warned that the usage of technology will led to the human passion for technique. He is also critical to those who consider technique as something that simply involved machinery and the original purpose of the technique is utilitarian elements. For Spengler, technology is a cultural pressure that is capable of forming a new cultural directly and thus develop a civilization if not been monitored or questionable of its usability. This civilization also is capable of destroying German society with a new culture. Spengler argued that both humans and nature are manifestations of technique and they are ready to be always against each other, something which is in an antagonism. The actual final victory of the technique is when separation thoroughly all mankind against nature.

Ellul define technique as the usage of the rational method thoroughly with the higher efficiency. He did also refer technique as a determination towards a way in order to achieve a goal. Ellul characterise techniques according to the civilization. Ellul blamed the technique as well as the emergence of science, politics and economics that ultimately failed to be controlled by the man himself.

In the optimism vs. Pessimism section, this paper discussed Heidegger, Spengler and Ellul reaction towards optimism and pessimism. For Spengler, he categorized optimism as coward because for him it is clearly seen that an optimistic person is someone who is being pessimistic towards appropriateness of technology. Heidegger do have the same kind of opinion as Spengler have but he said that there might be some profit behind the success of technology as he considered the words of Holderlin, “*But where danger is, grows the saving power also.*”

For Heidegger, he feels that art gives a more pure and meaningful exposure compared with the technology. Finally, Ellul clearly showed his pessimism as he purposely does not want to give any solution for the problem. However, in his writing entitled "The Betrayal by Technology," Ellul did show some relief by saying that humans obtain a little freedom once they realize that their life have been controlled by the technique. For him, the match against the fate technique is like Greek mythology which rise up against fate for the retention of human life.

In "*tentuisme*" vs. "*taktentuisme*" section, the writer comes up with three statements: technology determines the social and historical excel, technology is determined by laws of nature and technology determines itself and grow autonomously. Spengler never consider on the controlling the technology and thus he did act "*tentuistic*" towards the above three statements. On the other hand, for Heidegger, technique is something that could not be avoided in the human life. Technique is not for human by chance but that is the fate that shape the present life.

Ellul claims that technology decides itself in generating the new technology. It seems that technology is something that is independent. Moreover, Ellul gave an example by creating giant machines in which they actually creates many side effects and the thus question the efficiency of it. Consequently, another new technology is developed to fix the old weakness and at the same time creates the new problem. Ellul expressed his straightforward attitude can be categorized as "*tentuistic*" for the all three statements mentioned above.

For me, technique is an essential tool or key for humans; without technique, a person could not do his or her work efficiently. It is not a big deal for a human to apply an appropriate technique. Nowadays, people would always appreciate a person who have his/her own own technique. Technique is a key for the civilization and I am totally disagree with the Heidegger statement that technique is something that could not be avoided in the human life. For me, as long you do not have the incentive to do a work efficiently, you can omit the technique as well. In fact, not everyone does his/her work with technique. In my opinion, technique is for those who have a desire to do something and eagerly wants a good result.

For me technology is a kind of parasite. A technology is first developed it, and then repaired/maintained it or improved it so that it would perform better. However, although we know that there are so many side effects from the highly rated technology, yet we still keep quiet simply because of our materialistic view in life.

#### **HEIDEGGER'S THINKING ON THE ARTISTRY BY MR. FAUZI NAEIM MOHAMED (UNIKL)**

I like this paper. This paper contains two subtopics: what is art and about the world and the earth's upheaval. The subject of art is universal and it can be defined as diverse as it can be. To me even geometry is also under art. Nothing can be created without an art. Therefore, art is very basic elements in human development.

However, an art is also usually regarded as aesthetics where the later is a branch of philosophy which deals with questions of beauty and artistic taste. On the other hand, Heidegger was not interested in the questions of beauty and artistic taste. For him, the subject art plays an important role in making people conscious or aware and especially appreciate the meaning of the art.

I feel that there is a special meaning behind of each and every art. For example, if a child draws a picture of her mom, dad, and she stand in front of her house while holding hands, it reflects a good number of great meanings. First is love. Secondly, the drawing also shows the unity of family and responsibility of parents towards the family and the child and so on. If you sit back and look properly at your children's drawings, there are so many things that you can obtain values from it. The innocent child would naturally be able to produce so many significant meanings in his/her drawings.

What actually Heidegger looks at art in the perception of Greek tradition is "techne." We just had across with the word "techne" in the previous paper however Heidegger never meant art as technique ("techne"). He means "techne" as a way and forms of knowing. In the Heidegger's thinking, he feels that is a kind of "eye opener". Besides that, Heidegger defines things or objects based on how the objects interpret the situation on the condition of the equipments.

The best example that can be shown is the oil painting by Vincent Van Gogh. In the painting, there is a pair of shoes and my first impression of the painting is the old and ugly shoes. For Heidegger, he would interpret it as the shoes were owned by a women's farmer and had used it in her farming. He would say that the value of the shoes were higher when the women never had thought of her shoes. That means the shoes were in good condition and she did not need to think about it during

her working time. The problem will arise when the shoes show their defects as the shoes got older. What actually Heidegger looked from that particular painting was the upheaval world together with the farmers who worked on their lands.

The paper next discusses on the meaning of world and earth. In the context of world, Heidegger said that world acquired its meaning by the networks and organizations from our actions as humans along with the objects around us. It is also a union structure that reflects the relations between human, objects and nature. For Heidegger, earth is the background in which the world spreads. Earth is not something that can be understood through science. Earth is a place where it is never been “tired” in providing the humans a place to live. The earth did interact with human through the silent call of earth. This is shown in the Van Gogh’s drawing where the ugly and old shoes which were used by the women’s farmer. Unfortunately, I do not think that she had ever realized of the earth’s interaction.

For me, I agree with Heidegger’s view and the ways he interpreted a drawing. I do also admire the way he utilized the right meaning of the drawing and art. Art is a best way for a human to communicate with others or to tell a message but it is hidden. Maybe at the first look, you would not get much out of it but after a deep observation, I am sure that a right message will be obtained; and the matter of ugly or beauty of the painting would not matter any more. The later subjects are just for those who are not interested in the art. The one who really admires art will know the message in each drawing or art.

#### ***REVISIONISM: EXPANSION OF CONTEMPORANEITY BY MR. MOHAMMAD SAFAEI (UKM)***

This paper consists of five subtopics. First two subtopics discuss in detail on revisionism, followed by conformity, contradistinction, and contemporaneity. The writer first explained that in literature, revisionism is a twofold process. The first is the partial concordance with a literary figure and second is the creative endeavour to correct him. The momentum in literary revisionism is poetic influence or anxiety. The study of poetic influence is the exploration of the manners through which a poet misreads his precursor in order to prove his own originality.

Quoting the presenter, “Revisionism and poetic influence is a constituent of literary tradition which is the scene of agon (conflict) between the poetic masters and the new aspiring poets. As Bloom observes, literary tradition is not a simple process of transferring ideas and forms but a volatile state of conflict, between past genius and new aspirations. Meanwhile, the reward in the conflict for the strong poet is “literally survival” and the achievement of canonical status. In the process of revisionism, Bloom commences with deviation from the precursor and ends hierarchically in its ultimate form by the emergence of a new literary figure with the status of a canon. Any event or trend that disconcerts the hierarchical process of revisionism and hence impedes canon – formation is a regrettable discontinuity in the literally tradition for Bloom.” The presenter, Mr. Mohammad Safaei, argues that “the revisioning of a precursor or a previous work is inherently hermeneutic and necessitates hermeneutic explanation.”

Quoting the presenter again, “On the other hand, conformity defines the contours of the first phase of a revisioning act. Briefly, it is the reminiscence of continuity in tradition. What distinguishes a revisioning work from other forms or genres is some degree of conformity which relates the reader to the original work. Conformity is more than intertextuality, for there is reciprocity between conformity and tradition. Tradition is the preliminary stage of understanding. What makes tradition possible is continuity in the transmission of tradition that renders our historical temporal intelligible. Therefore, conformity is not an expansion of the original work.” For the presenter, “conformity is an understanding that is historical in essence. Next is the contradistinction which signifies a writer’s deviation from the original work with the aim of correction and the achievement of distinction where it is not the renunciation but the further expansion of the original work. In the domain of hermeneutic understanding, contradistinction can be regarded as horizon change from a rhetorical perspective that can be construed as an instance of irony.”

The presenter then quoting Gadamer, “the contemporaneity of a work of art signifies that “it stands open in a limitless way for ever new integrations,” meaning that the originator of a work may have a particular audience in his mind, but the meaning which that work conveys to different communities may extend through time and beyond its original historical boundaries. So, as long as a work is understood, it is contemporaneous.”

The presenter further stresses that “paradigms determine our understanding and interpretation of the world and its varied phenomena within certain recognized frameworks. However, paradigms are subject to change when they prove inadequate in their interpretive comprehensiveness. The very concept of revisionism and the interpretation of various literary or historical phenomena as continuity and discontinuity within Western literary tradition are affected by the criteria and the nature of the paradigms developed by historians or critics to explain such phenomena. In a nutshell, contemporaneity is affected as well as enriched by several revisioning mainstreams in various fields.”

#### **THE DEBATES ON EPISTEMOLOGICAL CRITICISM BY DR. MOHAMMAD ALINOR BIN ABDUL KADIR (ASASI)**

This paper mainly contains 3 subtopics. They are classical formulation of epistemology, phenomenology of Husserl formulation and critiques of the epistemology. Epistemology is a field of study arises from the eagerness of humans to know about something to do with the source of human knowledge and the appearance of such knowledge in the human mind. This can be summarized in seven epistemologies. The first one is the realism. This is when the mind getting aware of external objects which exist separately from it. Next is materialism where knowledge is a quality of the soul and thing is not the issue. Another is representationism which is the outward transfer forms to mind. Other type of epistemology is known as subjective idealism, and that is when the external objects are believed to be creations of the mind. Objective idealism is when external things are believed to be the creation of finite mind or universal. Transcendental idealism is when external things confirmed its existence by mind through concepts of mind thing. The final one is dialecticism where direct external things cannot be understood by the mind.

The presenter then shows how Husserl's phenomenology principles were simplified. The first one is to show that calculus logic is not a natural language. Language is not a method of reasoning while calculus is methods of system representation (symbol for the soul phenomenon). Second one is to show that logic is not a calculus logic. Calculus involves technique while logic not only a sign but is about the content of the concept.

The next principle, the deductive logic is not same with the reasoning techniques, or theoretical reasoning. There are operations other than deductive reasoning. Then, it is not true that calculus class is the only possible exterior. Calculus concepts and intentions may also be. Logic of external class (autonomy) is not possible for every external perception. If it is possible, it would be the notion of intent.

Response is divided into logical content and al-Khwarizmi content. Logical content is content being perceived, that is what is stated. When the notion categorized to the relationship between classes, they are both equal, but not always the same. In fact both are just the same as the notion is the notion of classes. The next principle is the perception by itself is not intended to classes or to the concept of content but to the concept of the object. Finally, geometric reasoning is not operational signs and pictures. Sign is just the support to the concept of operations and to the intended concept of objects.

In the last subtopic, this paper discusses on the critiques of the epistemology. There are three critiques. The first critique is criticism of human strive to acquire knowledge. In this case, human tend to find the knowledge in order to find something else. It can be money, other material, name or even fame. Then knowledge criticisms of things are said to come from it. The third one is critique of the sign / letter / language.

### **Catatan Pra-persidangan Model Kepemerintahan Islam Semasa**

Tarikh: 1 September 2013 (Ahad)

Masa: 9:30 pagi – 1:00 tengah hari

Tempat: Hotel Adamson, Kampong Bahru, Kuala Lumpur.

Anjuran: MAPIM & GATERA

#### **1.0 Ucapan Pengerusi**

Salam dan terima kasih di atas kehadiran semua tuan-tuan dan puan-puan ke Pra-persidangan Model Kepemerintahan Islam Semasa ini yang dirancang sebagai forum untuk mendapatkan maklum balas, komen dan teguran secara langsung. Kita mengharapkan agar sesi cetusan idea bersama ini membantu kami memperbaiki arah tuju, isi dan kandungan supaya Persidangan nanti menjadi lebih mantap dan dapat dimanfaatkan oleh para pemimpin dan juga pembuat dasar negara-negara Islam. Untuk makluman, kita ada kira-kira 4 - 5 bulan lagi sebelum Persidangan ini berjalan pada akhir tahun ini. Ada 4 orang pembentang undangan, bakal pembentang undangan di Persidangan akhir nanti, tetapi seorang daripada tidak dapat hadir. Tinggallah 3 orang pembentang, iaitu Dr. Abdul Halim El-Muhammady (penyelidik/ilmuwan bebas (Mantan akademian UKM), Dr. Hanif Ahmat dari UIA dan Dr. Ismail dari UUM, yang mengisi program sepagi hari ini.

2.0 **Dr. Abdul Halim El-Muhammady** yang disarankan untuk membincangkan “Model kepemerintahan Islam di Alam Melayu Dahulu: Pengajaran dan Ikhtibar”. Beliau menyatakan yang beliau akan memberikan fokus kepada Sejarah Pahang pada zaman pemerintahan Sultan Abdul Ghafur Mahyuddin Shah (1552 – 1614) untuk meneliti membentangkan rupa dan bentuk ‘model’ sebuah kepemerintahan Islam di Negeri Melayu dalam abad 16 dan 17. Ini dapat beliau laksanakan kerana minat serta pengalamannya yang agak lama@mendalam dalam mengumpul dan mengkaji pelbagai manuskrip Kerajaan Melayu silam dalam abad 15 sehingga ke abad ke 18 Masihi. Dalam konteks Persidangan ini, beliau akan menumpukan kepada manuskrip Qanun Pahang hasil nukilan kerajaan Pahang atas nama Sultan Abdul Ghafur yang terebut di atas.

Di antara sebab mengapa beliau memilih untuk membicarakan Qanun Pahang ialah hakikat bahawa dalam tempoh 300 tahun, ternyata model Qanun Negeri Pahang ini lebih lengkap walaupun ketika itu setiap Negeri Melayu mempunyai undang-undangnya sendiri. Menurutnya lagi tidak benar bahawa di seluruh Negeri Melayu hanya Negeri Melaka saja yang memiliki undang-undang Negeri kerana Negeri-Negeri Perak, Johor dan Kedah juga ada undang-undangnya sendiri. Beliau menemui sekitar 50 buah salinan manuskrip qanun bermula dengan salinan Qanun Melaka bertarikh 1444 M (pertama kali dijumpai oleh Winstedt)

Dalam konteks undang-undang Negeri Melayu ternyata Undang-undang Negeri Melaka dan juga Undang-Undang Laut Melaka sering disebut-sebut sebagai contoh undang-undang kerajaan Melayu-Islam silam. Undang-Undang Laut Melaka misalnya menjelaskan peranan atau pun wibawa (authoriti) pelbagai pihak di dalam sesebuah kapal. Undang-Undang Melaka secara rasmi, menyatakan Rajanya Islam dan agama yang diiktiraf juga Islam, dan Mazhab Shafie dipakai; namun Qanun Melaka itu keseluruhannya terdapat lebih banyak unsur adat daripada unsur Islam. Ini menyebabkan sarjana Eropah berpendapat bahawa adatlah yang mewarnai undang-undang silam kerajaan Melayu Islam dahulu di mana jua pun. Pandangan ini tidaklah benar apabila ditelaah Qanun Pahang. Qanun Pahang yang dibicarakan nanti tidak demikian halnya. Ciri-ciri Qanun Pahang itu seperti berikut:

2.0.1. Bentuk tulisan dan pemikiran dalam Qanun Pahang bukan dari sumber Arab atau Hindia, walaupun nama hari, orang yang disebut di dalamnya dan nama pemerintah memang dipengaruhi bahkan bersumberkan Arab.

2.0.2. Fiqah dan perundangan yang diterima pakai dipengaruhi oleh Mazhab Shafie sepenuhnya, atau ahli *Sunnah wa al-Jama‘ah* amnya.

2.0.3. Qanun Pahang (QP) menyatakan bahawa kuasa, wibawa itu berada di tangan Raja sementara adatlah yang menjadi pengikat antara rakyat dengan Raja. Qanun Melaka masih adat menjadi wibawa seperti penentang raja dihukum durhaka (dibunu) tanpa bicara lagi.

2.0.4. QP dari *Asiatic Society of London* menyatakan bahawa Raja itu khalifah Allah di bumi dan ini ditafsirkan sekiranya tiada Raja maka tidak adalah pelindung makhluk di bumi ini. Sehubungan dengan ini, dalam bab mendurhaka kepada Raja dijelaskan barang siapa yang menentang Raja dicincang 99 kerat. Sungguh dalam Syariah pemberontak pemimpin Islam dinamai bugah dan menerima hukum yang amat berat tetapi tiadalah hukum seperti itu yang diperakuan di dalam syariah. walaupun raja tetap dianggap sebagai berwibawa seperti nabi yang wajib ditaati sebagai *ulil amri* tetapi penentangnya boleh diampunkan jika bertaubat; sebaliknya diperanginya. Ini sudah menyeleweng daripada adat. Rakyat diibaratkannya seperti kambing dan raja sebagai gembalanya. Raja melantik semua pegawainya. Ada 4 salinan Qanun Melaka yang dijumpainya.

2.0.5. Terdapat bukti undang-undang itu digubal dan diiktiraf. Dalam undang-undang itu dicatatkan dengan jelas tugas Raja dan juga para menterinya.

2.0.6. Qanun ialah istilah ciptaan sarjana Muslim dahulu yang bermakna undang-undang campuran Islam dan sekular.

Persoalan yang diutarakan oleh Dr. Halim:

S1. Kenapakah pandangan serta tulisan para pengkaji Barat misalnya Taylor dan Winsteadt itu diterima sementara tidak pandangan sarjana Melayunya?

S2. Raja Melayu yang asli dahulu sukar dibayangkan melakukan kezaliman di luar batas Islam kerana raja ini dibatasi persekitaran Islam dan oleh undang-undang yang diperbuat olehnya sendiri dengan penasihat ulama yang berwibawa. Raja-raja Melayu yang digambarkan penuh zalim itu adakah sebenarnya raja Melayu?

### **3.0 Pembentangan Dr Haniff Ahamat**

Beliau diminta membentangkan “Cabaran kepemerintahan Islam Masa kini”, tetapi untuk sesi ini beliau memohon untuk menumpukan kepada isu kedaulatan dan sebab kegagalan kepemerintahan/pemerintahan Islam/Muslim pada abad mutakhir ini. Di antara isi pokok yang beliau sentuh ialah yang berkisar pada 4 isu yang berpaksikan pada perkara yang diistilahkannya sebagai projek penjajah (peranan elitis atau bangsawan Muslim, kemerdekaan/kedaulatan, kedemokrasian) dan kefahaman-kewarasan-kebijaksanaan pemimpin Muslim. Butir-butir yang menyentuk perkara ini ialah yang berikut:

3.0.1. Beliau mohon membicarakan aspek undang-undang antarabangsa dan ruang lingkup kedaulatan Negeri-Negeri Melayu.

3.0.2. Sebagai contoh apabila kita bercakap tentang kemerdekaan, apakah kemerdekaan Malaysia itu 1957 atau pun 1965? Bagaimana konteks Sabah dan Sarawaknya?

3.0.3. Apakah benar hujah bahawa ‘Malaya itu tidak pernah dijajah’, salah sebuah pernyataan kontroversial yang dilemparkan oleh sarjana Melayu apabila perjuangan Mat Indera dipanaskan sebagai isu politik?

3.0.4. Dalam konteks kedaulatan dan undang-undang melibatkan Negeri-Negeri Melayu, ternyata perjanjian Naning 1754 itu tersangat zalim (*berat sebelah Inggeris*). Perjanjian demi perjanjian seperti inilah yang berlaku dalam Perjanjian Pangkor, Perjanjian Francie Light dengan Sultan Kedah dan .. perjanjian Inggeris dengan Sultan-Sultan lain di Malaya in. Perjanjian inilah yang menghakis kedaulatan raja-raja Melayu. Pengecualian kuasa Inggeris ke atas “Hal-ehwal Agama dan Adat Istiadat Melayu” daslam setiap perjanjian itu menjadi kuasa Sultan amatlah terhad sehingga *de facto*-nya Inggeris memang penjajah Malaya.

3.0.5. Dalam konteks kedaulatan sesebuah negeri/negara dikatakan bahawa faktor-faktor yang mempengaruhinya ialah elemen dalaman dan juga unsur hubungan luar.

3.0.6. Tanggapan berdaulat dan merdeka dapat dilihat pada Tok Ku Paloh. Kegagahan Sultan Omar di Terengganu.

3.0.7. Faktor Islam, Hindu dan adat banyak mepengaruhi kita. Pengaruh Hindu dalam pemerintahan kita ialah Sistem Mandala yang berupa pengaruh lingkaran sepusat, iaitu semakin jauh dari pusat semakin lemah penguasaan Raja. Sistem inilah yang memudahkan kuasa luar seperti portugis dan siam mudah menyerang dan mengalahkan kerajaan Melayu.

3.0.8. Setelah Perang Dunia kedua, Bangsa-Bangsa Bersatu wujud dan antara misinya ialah untuk melakukan penyah-penjajahan (dekolonisasikan). Misi ini tidak berjaya. Malah semenjak itu projek kolonial Barat bermula, dan negara-negara Islam menjadi medan pelaksanaan projek kolonial Barat hingga sekarang:

3.0.8.1. Dengan wujudnya projek kolonial Barat, maka tidak adalah demokrasi di negara-negara Islam. Misalnya tak ada demokrasi di Mesir dan Iraq. Sehubungan itu Arab Saudi itu hanyalah pemerintah kabilah yang bertuankannya Amerika. Sekiranya kabilah Bani al-Sa‘ud kalah, maka yang akan muncul adalah kabilah yang baru dan malah hampir pasti, umpamanya nama negara

Arab Saudi sekarang akan dihapuskan kata sifat “Saudi” itu jika kabilah Ibnu Sa’ud sekarang tidak lagi memerintah negara itu. Ini contoh jelas betapa TIDAK wujudnya demokrasi di negara-negara Islam kerana itulah projek@kehendak Barat sebenarnya. Ertinya Projek Kolonial Barat menyebabkan negara-negara Islam mundur kerana suara rakyat@demokrasi tidak dibenarkan hidup subur.

3.0.8.2. Contoh-contoh projek barat dapat dilihat di Goa (oleh British) dan Pondocherry (oleh Perancis).

3.0.8.3. Amalan politik Barat itu sendiri (UK dan US umpamanya) masih wujud unsur-unsur Kristiannya walaupun dikatakan sekular.

3.0.8.4. Negara bangsa menggantikan negara gereja (Perancis yang pertama berbuat demikian). Ini diikuti oleh Muslim.

3.0.8.5. Kita jarang belajar pendekatan yang dibuat oleh Barat apabila mereka menguasai sesuatu bangsa/negara. Barat sentiasa membawa masuk tentera, tentera upahan/lanun dan juga birokrat dan ahli sosiologi. Pemimpin akademik kita mahu tutup (atau memperkecilkan) bidang sosiologi!

3.0.9. Isu yang timbul ialah kenapakah pemerintahan gagal?

3.0.9.1. Penguasaan elit politik yang mengekang demokrasi, terlebih dan berlebihan suntikan nasionalismenya. Elit politik yang termasuk perkhidmatan awam dan juga medianya. Kegagalan gerakan Islam antara lain ialah sebab ini, iaitu kehilangan kewarasan atau kebijaksanaan. Contoh keadaan ini sudah pun yang dinyatakan oleh Ibn Khaldun dalam *Muqaddimah*-nya.

3.0.9.2. Amalan nasionalisme yang melampau atas nama negara bangsa.

3.0.9.3. Tidak ketinggalan ialah persoalan nilai (contohnya Raja itu bayangan Allah di bumi. Itu adalah pengaruh Hindu).

3.0.9.4. Di samping itu kita di Malaysia masih belum selesai isu negara-bangsanya. Indonesia sudahpun mencapai taraf itu. Peranan Chulalongkorn patut diambil ikhtibar. Dia bertanggungjawab hapuskan raja-raja kecil dan juga pengaruh Islam.

3.0.9.5. Masyarakat Melayu masih lagi satu masyarakat yang belum mencapai tahap sebagai pengeluar, masyarakat yang mampu menghasilkan sesuatu. Kita masih lagi pengguna yang berada di zon pertengahan. Kita (Muslim) belum miliki taraf kemerdekaan ekonomi (kerna tiad pengeluaran ekonomi kita sendiri) sebaliknya hanya menjadi pengguna atau setengahnya paling tinggi pun orang tengah ekonomi sahaja.

Syor Haniff:

H1. Kita perlu mempelopori politik beradab.

H2. Kita perlu mengorak langkan ke arah mencipta globalisasi daripada bawah seperti yang dimulai oleh Thailand

#### **4.0 Pembentangan Dr Ismail Yusof**

4.0.1. Beliau memulakan dengan mengulas beberapa isi yang dibangkitkan oleh pembentang terdahulu:

4.0.1.1. Malaysia belum lagi mencapai taraf negara-bangsa dan syarat untuk mencapai taraf negara bangsa ialah perpaduan.

4.0.1.2. Pandangan pakar bahawa kita tidak pernah dijajah itu tidak tepat.

4.0.1.3. Mesir itu 1/3 (satu pertiga) dimiliki tentera. 40% rakyat Mesir buta huruf. Jutawan Kristian menguasai media. Hakim itu terdiri daripada tentera dan polis.

4.0.2. Butir mauduk ceramahnya sendiri ialah berdasarkan tesis D. Fal-nya tentang TGNA yang antara lainnya muah menyangkal hujah lumrah bahawa ulamak tidak boleh memerintah. Isi-isi penting yang disentuh:

4.0.2.1. Mengikut Dr Ismail di Malaysia terdapat tiga Negeri atau kawasan yang menjadi perhatian para pengkaji sekalian iaitu: pertama 75% dari minat itu tertumpu kepada Negeri

Kelantan sementara dua Negeri/Daerah lain yang sering dikaji ialah Negeri Sembilan dan Kampong Baru, Kuala Lumpur.

4.0.2.2. Beliau tertarik mengkaji kepimpinan TGNA kerana dakwaan yang dipopularkan ketika itu iaitu ‘ulamak tidak boleh memimpin’. Ternyata TGNA mentadbir Kelantan selama 22 tahun (1990 – 2012) dengan membawa model pemerintahan Islam.

4.0.2.3. Apakah dia kepemerintahan Islam? Dalam Al-Quran negara Islam itu disebut uli-amri ertinya ada pemerintahan Islam. Mengikutnya, ciri-curi kepemerintahan Islam ialah islamnya pemimpin berkenaan, pemerintah yang menjaga agama dan pemerintah yang mengiktiraf kepentingan ilmu.

4.0.2.4. Apa yang ada di Kelantan? Di sana wujud amalan syura — keadilan, kebebasan dan persamaan hak dari segi keadilan.

4.0.2.5. Kegagalan melaksanakan hudud kerana bertentangan dengan perlombagaan persekutuan tidak mematikan hasrat kerajaan Kelantan di bawah TGNA mewujudkan ciri-ciri kepemrintahan Islam. Beliau memulakan langkah ke arah itu dengan pelaksanaan konsep ‘*amar makruf nahi mungkar*’ yang mudah-mudah yang boleh diterapkan dalam pentadbiran sehari-hari misalnya memulakan dengan doa/ *Surah Al-Fatiyah* dan mengakhirinya dengan tasbih dan *surah al-'Ashr*.

4.0.2.6. Pendekatan pentadbiran yang lain termasuklah *exco*-nya tidak membeli kereta baru, amalan tender terbuka, mengisytiharkan cuti dua hari seminggu iaitu Jumaat dan Sabtu dengan Sabtu sebagai hari untuk keluarga. Inilah satu amalan yang akhirnya terpaksa ditiru oleh kerajaan pusat iaitu semasa TPMnya ialah Ghafar Baba.

4.0.2.7. Memulakan Tabung Serambi Mekah bermula dengan dana wang yang diperolehi kerajaan Negeri kerana pengambilan balik tanah untuk pembinaan Empangan Pergau oleh TNB. Tabung ini tujuan perubatan penyakit kronik. TNB membayar 140 juta RM walaupun kerajaan Kelantan meminta pampasan hanya 4 juta RM!

4.0.2.8. Menghapuskan riba dengan mengeluarkan wang simpanan negeri dari bank-bank yang mengamalkan riba. Pinjaman penjawat awam juga dibebaskan daripada dikenakan riba **atas** nama cas perkhidmatan (*service charge*). Rasionalnya, cas itu tak relevan kerana keran semua pegawai yang terlibat sudahpun menerima gajinya kerana menjalankan tugas itu.

4.0.2.9. Memulakan sistem pajak gadai Islam iaitu untuk membantu para peniaga wanita di pasar-pasar.

4.0.2.10. Mengharamkan wayang kulit yang dalamnya terdapat unsur-unsur syirik dan bertentangan dengan ajaran Islam. Mengharamkan dikir Barat yang dulunya terdapat unsur-unsur lucah.

4.0.2.11. Memisahkan wanita-lelaki pada kaunter bayaran. Rasionalnya sama dengan pemianan tandas.

4.0.2.12. Tidak membenarkan jualan arak dan loteri secara terbuka.

4.0.2.13. Istilah “puja umur” dikekalkan secara tak rasminya tetapi pengisianya diIslamkan seperti menggantikan dengan lawatan ke pondok.

4.0.2.14 mewujudkan persekitaran Islam menerusi amalan sembahyang berjemaah, berdoa selepas ikhtiar (sembahyang hajat besar-besaran dan secara awam), waktu pasar malam yang tidak menimbulkan fitnah dengan waktu sembahyang, mewujud hotel Islam dan memnyembulkan senibina mesjid yang tidak hanya berpusat kepada senibina timur tengah atau Turki.

## 5.0 Komen umum para peserta

5.0.1 Tajuk kertas-kertas kerja Dr Halim Al-Muhammady dan juga Dr Haniff Ahamat diubah sesuai selaras dengan isi yang akan dibentangkan.

5.0.2 Disarankan agar kertas kerja Dr Haniff Ahamat mengambil kira keadaan masa kini, sudut wibawa, nas dan juga cabaran untuk Negeri Kelantan. Istilah ‘kepemerintahan’ (governance) itu dirasakan terlalu besar untuk amalan kerajaan Kelantan dan istilah yang lebih sesuai mungkin pentadbiran Islam.

5.3 Dalam meneliti pentadbiran Islam Kelantan itu disarankan agar situasi sedia ada dengan kelebihan dan juga segala kekangannya dibentangkan, misalnya kekangan Malaysia sebagai sebuah negara persekutuan (federalisme). Ertinya ruang lingkup yang mengongkong itu dijelaskan. Perbincangan elok dikelaskan kepada bidang seperti bidang ekonomi, keadilan sosial, perubatan dan sebagainya.

- 5.0.4 Segala contoh yang dibentangkan oleh Dr Ismail Yusof itu, apakah ia kepemerintahan Islam atau pun sekadar contoh-contoh yang dilaksanakan?
- 5.0.5 Untuk perhatian Dr Halim, apakah Qanun Pahang itu dilaksanakan atau apakah ia hanya sekadar sebutan? Bukankah undang-undang kita itu hanyalah ‘adat’— ‘penglipur lara’ yang tak perlu dilaksanakan, dan memang tak pernah dilaksanakan seperti yang sarjana Barat perkatakan?
- 5.0.6 Kelebihan undang-undang Barat ialah tentang rekodnya. Itu tidak ada dalam sejarah undang-undang kita. Namun apakah yang dapat kita ‘baca’ dari sejarah? Bukankah Melaka terkenal kerana ‘keselamatan yang diberikan’ selama lebih 300 tahun? Bukankah ini menunjukkan bahawa roh undang-undan itu wujud?
- 5.0.7 Apakah Sultan yang ada itu Sultan kita? Bukankah Sultan-Sultan sebenar itu ada ciri-ciri kesultannya sendiri? (Tidakkah ini menghasut? Hubaya...)
- 5.0.8 Bukankah sistem feudal Malaya itu sendiri tidak betul? Dalam konteks ini, perlu diperhatikan bahawa hadis yang mengatakan bahawa Raja itu bayangan Allah di bumi itu hadis palsu yang diangkat semula? Apakah kita mahu meneruskan kesilapan dan kelemahan kita di zaman ini?
- 5.0.9 Ada yang berkata teruja dengan ‘nilai’ yang dibawa dan ditanam oleh TGNA. Persoalannya ialah bagaimanakah TGNA melakukannya — mengubah pegangan ‘nilai’ itu? Misalnya di Malaysia sekarang ini hanya terdapat 3.0 juta hektar (?) Tanah Simpanan Melayu. Dari jumlah tersebut 1.7 juta hektar di Kelantan! Di sekitar Kampung Baru di Kuala Lumpur ini, rumah-rumah orang Melayu yang meriah dengan bendera Umno, meriah juga dengan papan tanda “Land For Sale”! Kenapa?!
- 5.0.10 Keperibadian tokoh membentuk nilai. Dalam sejarah kita temui Tun Perak (Melaka) dan Sultan Zainal Abidin (Terengganu) dan negeri Melaka kaya dan banyak adatnya. Pemerintahnya Muslim, rakyatnya majoriti Islam. Syariah adalah identiti negara dan sejarahnya sepanjang 300 tahun.
- 5.0.11 Kita percaya pelakasaan Islam itu mestilah bertahap dan ini dalam konteks semasa kita melihatnya dalam formula Erdorgan dan Morsi.
- 5.0.12 Kita cadangkan supaya Urusetia sediakan logo persidangan dan kertas kerjanya dimantapkan. Urutan kepala tajuk juga mestilah tepat, misalnya bermula dengan ‘tujuan’ dan bukannya ‘latar belakang’. Dicadangkan supaya kertas kerja dari Maghribi juga dimasukkan untuk menunjukkan pengalaman Islamnya.
- 5.0.13 Dicadangkan apa yang telah direkodkan Tom Pires dalam catatannya diberikan perhatian. Misalnya beliau telah menyatakan bahawa cukai dikutip di Sulawesi dan Mindanao. Ini secara tidak langsung menunjukkan pencapaian ekonomi Melayu di kepulauan Melayu.
- 5.0.14 Dikatakan kezaliman Raja-Raja itu dipengaruhi oleh Hindu dan Buddha? Dikatakan juga yang lebih asli Melayunya ialah penglipur lara, misalnya “Awang Sulong Merah Muda” sebuah sastera rakyat yang tidak ada pengaruh luar.
- 5.0.15 Konsep negara/pemerintahan Islam sekurang-kurang ada dua pandangan, iaitu berlembut (perlembagaan tidak semestinya berubah) dan keras (mengislamkan perlembagaan) yang boleh diwakili oleh cara Nik Aziz (Kelantan) dan cara Hadi Awang (Terengganu) atau Erdogan (Turki) dan Morsi (Mesir).

## 6.0 Kertas kerja baru yang dicadangkan

- 6.0.1 Implikasi kepemerintahan Islam terhadap wanita dan etnik minoriti. Aspek ini perlu kerana Islam itu kerap juga disoroti oleh kelompok puanis (feminis) dan juga kaum minoriti. Jika memungkinkan kertas ini ditulis oleh sarjana wanita Barat yang telah melalui dan mengalami proses Islamnya.
- 6.0.2 Cabaran perubahan pemodenan, ekonomi dan kesannya terhadap perubahan nilai.
- 6.0.3 Pemerintahan Islam di Aceh – pengalaman dan kenyataan (realiti) kini oleh Dr. Alwi Al-Atas.

## 7.0 Penutup

Pra-persidangan ditangguh dengan ucapan ribuan terima kasih, *tasbih kafarah* dan bacaan *surah al-Ashr* oleh Sdr Dinsman yang menggantikan Cikgu Azmi Abd Hamid sebagai pengerusi.

Laporan oleh Kassim, SUA PAKSI dan Pra-Persidangan ini.

## Laporan Seminar Luar Negara

### Seminar report on ‘How secure is democracy in the Subcontinent?’ : A Democracy Forum on 23 July 2014

London’s prestigious School of Oriental and African Studies was the setting for The Democracy Forum’s third conference of the year on Wednesday July 23, which asked the pertinent question: ‘How secure is democracy in the Subcontinent?’

The seminar, attended by 45 guests, was chaired by Rita Payne, President of the Commonwealth Journalists’ Association, and on the panel were Professor Pritam Singh from the *Department of Accounting, Finance and Economics* at Oxford Brookes University; Dr Kiran Hassan, South Asia Researcher at the International Institute of Strategic Studies; Adnan Rafiq of St Antony’s College, University of Oxford; and Babar Ayaz, journalist and author of *What’s Wrong With Pakistan?*

After a few words of welcome from The Democracy Forum’s Chair Sir Peter Luff, who remarked on the timely nature of this seminar, Rita Payne offered a brief overview of current events in the Subcontinent before introducing the first speaker. In Adnan Rafiq addressed the question of ‘Diffusion of power: understanding change and persistence in Pakistan’, offering a structural analysis of Pakistan’s society, looking at change through a sociological lens and comparing the country’s current democratic transition with the last one. As long as all the various segments of Pakistani society are entrusted with the continuation of the democratic process, said Rafiq, there is hope for democracy in the country. For Babar Ayaz, Pakistan’s democracy has remained quite weak, with many forces who want to destabilise the political establishment. ‘How ailing or failing is the Pakistan state?’ he asked, looking at various institutions and aspects of the country, and labelling them ‘good’, ‘poor’ or ‘average’. Ayaz blamed Pakistan’s tenuous democracy on the weak rationale of the Two Nation Theory. Pakistan’s middle classes and big business are now leading the political narrative, claimed Ayaz, but the military’s institutional supremacy is a real threat to democracy. In India’s development – pre-1947, post-1947 up to 1991; and post-1991 – considering amongst other matters the increasing competition with neighbours such as China and Western global partners, poverty in India, and class-related and nationalist conflicts. He concluded that despite having the necessary infrastructures in place to sustain it, India must continue to work at democracy. Dr Kiran Hasan chose as her theme ‘Pakistan’s vulnerable democratic transition – challenges and opportunities’, and observed that Nawaz Sharif’s record after one year back in power raises questions about whether he can deliver on his promises.

During the Q & A session that followed, the many well-informed members of the audience raised a wide range of questions and comments, including what Sharif could do to benefit Pakistan, the legitimacy of India’s new government, the nature of Pakistan’s identity and media freedom in the Subcontinent. Rita Payne and the speakers rounded off with a few words on the need for stability and how democracy is always a journey, before Sir Peter Luff thanked both speakers and audience for a lively and worthwhile debate.

### A Brief Report on Islamic Ethics and Education Seminar, 24 April 2014 At Oxford University

The Research Center for Islamic Legislation and Ethics (CILE) organized a scholarly seminar entitled “the Islamic Ethics and Education” for three days from April 22nd to April 24th, 2014 at Oxford University, UK. A number of scholars, thinkers and experts of education participated in this seminar from Arab and European countries including Britain, France, Germany, Belgium, Morocco, Yemen,

Jordan, Turkey and Egypt. Other participants also included the executive director, deputy director and some of the personnel of CILE at Doha, Qatar.

Prof. Tariq Ramadan CILE's Executive Director and Professor of Contemporary Islamic Studies in Oxford University, Britain, opened the seminar welcoming the participants and attendees. Earnestly, he emphasized the importance of such seminar in promoting root intellectual ideas and developing discussions on strategic issues. He then gave the floor to Chauki Lazhar, CILE Deputy Director, who introduced briefly the Research Center for Islamic Legislation and Ethics (CILE) in terms of vision, mission and goals with emphatic indications to CILE's efforts in drawing connections between the scholars of texts and those of context to shun imperfections that befall the processes of creative legal reasoning, thinking, theorization and application in CILE's twelve areas of research including education, politics, economics, psychology, media, biomedical ethics, environment and other areas.

The seminar moderator, Dr. Fethi Ahmed, took the floor and delivered the inaugural speech. Notably, he highlighted CILE's attempts to tackle some areas of Islamic thought and legacy in its serious endeavors to respond to the major questions that face the Muslim Ummah in a unique approach combining tradition, modernity and creative intellectual models of thought within the major maqasid (Objectives of Shari'ah) system of Islam with focus on the central role of ethics in all areas of life.

Dr Ahmed set the seminar in its right context stating that it comes within the CILE's care for education as a backbone of all comprehensive activities of reform. It tries to provide answers for two specific questions: One is theoretical, which is: what are the higher objectives of education in Islam? The other is practical, which is: what is the optimal approach for introducing the natural and social sciences into the Islamic studies programs?

The seminar moderator then stated that theorization, produce of ideas and coinage of new terms are highly significant but right application, choice of right approach and appropriate technologies are necessary underpinnings. It is also necessary to coin and translate ideas, theories and new terms in practical programs, curricula and modules for the formation of the desired intellect, child personality and man to prove successful and creative in scientific and practical life. Thus fulfill the duties of human stewardship over earth.

It has also been emphasized that the exact distribution of the seminar program over three days shows CILE's due care for quality dialogue and discussion as well as exchange of ideas and views on the theme of the seminar and the questions posed. The time designated for discussion nearly doubles the time devoted for presenting researches and comments. In addition, each research presented to the seminar is reviewed by a specialized professor, which enriches dialogue, deepens serious scholarly debates and helps positive interaction among the scholars, thinkers and attendees for the achievement of the seminar goals.

The seminar's first day (April 22nd, 2014) has included two research papers; the first was presented by Prof. Dr. Said Ismail Ali, Professor of Educational Foundations, Ain-Shams University, Egypt, entitled "High Objectives of Islamic Education" followed with comments by Dr. Farid Panjwani, a Senior Lecturer and Director of Islamic Education Studies at the Institute of Education, University of London, UK. The second was presented by Dr. Ahmed Daghshai, Professor of Islamic Educational Foundations and Philosophy, Faculty of Education, Sana'a, Yemen, entitled "Higher Objectives of Education and Training in Islam: A Critical and Theoretical Study" followed with comments by Mr. Ömer Korkmaz, Director of Education and Curricula, Suffa Institute for Human Studies in Istanbul, Turkey.

The second day (April 23rd, 2014) has included two practical research papers; the first by Sheikh Hafiz Sulayman Van Ael, Lecturer of Theological Doctrines, Islamic University of Rotterdam, Holland, entitled "Integration (Idmaj) of Natural Sciences into Religious Sciences" and Prof. Dr. Ahmad Jaballah, Director of the European Institute of Human Sciences, Paris France, has commented on it. The second research was presented by Prof Dr. Khalid Samadi, Team Leader of Knowledge and Values Research Group at the Moroccan Center for Studies and Educational Researches and the Advisor of the Head of Government of the Kingdom of Morocco. His paper is entitled "The Complementarity Between Knowledge and Values in the Educational Curricula: A Theoretical Approach and Applied Projects" followed with comments by Dr. Khalid Hanafi, Dean of EIHW, Frankfurt, Germany.

On the final day, Mr. Ömer Korkmaz, Director of Education and Curricula, Suffa Institute for Human Studies in Istanbul, Turkey, presented a research paper on "The Turkish Experience in

Merging the Islamic Subjects and the Natural Subjects in High Schools.” At last, all professors, researchers and attendees reflected deeply in pure moments of contemplations on the themes, questions and issues raised and presented in the previous two-day discussions to give recommendations of which the following are most important:

- Education and ethics are absolutely inseparable in Islam; they have a universal dimension from the Islamic perspective and inclusive vision of universe and life.
- Integration of religious knowledge with natural and social sciences is necessary apart from the actual merging, as it is necessary to keep the independence and distinction of sciences in terms of themes, approaches, concepts and terms.
- Methodological determination of terms is highly essential, such as the relationship between purposes and ends and standardizing the determination of ends and purposes to fall under evaluation and application bearing in mind that, as Muslims, our educational vision competes with other visions.
- It is necessary to re-examine and explore the higher objectives of education in the sources of revelation: the Qur'an and the Sunnah, by help of traditional books and early sources to formulate these objectives in a vision not only compliant with Muslim needs but also capable of competing with other worldviews.
- It is necessary to undertake a real bibliographical survey of written literature, Islamic and non-Islamic, on the education and ethics and to translate the relevant Arabic literature into English.
- It is significantly important to inventory and study the educational experiences and projects of educational reform in the Arab and Muslim worlds, such as the experience of International Islamic University in Malaysia, the Islamic University in Pakistan and the experiences of Islamic education in Turkey, Morocco and other countries as well as other non-Islamic religious experiences on the same theme. It is also necessary to conduct interviews with experts of other religions for deeper discussion to avail ourselves of their knowledge and discover the points of difference between their views and ours in order to designate the defects and avoid them while being cautiously on guard and prudently wise in dealing with the ideas, concepts and systems that have been produced and developed by other nations.
- Given the fact that some experiences have special characteristics as to their special realities and evidently different perceptions in determination of concepts and terms, it is not an excuse for being trapped in vicious circle; we should rather have a starting point and a launching process to work out the problems from the premises, which is partly the foundation of scholarly methodology wherein an available opportunity appears for later evaluation and amendment.
- It is necessary to study the values, standardize their order in the value system, explain the nature of the relationship between the values and education and review the relevant literature on ethics.
- Thinking of all possible solutions for the treatment of the crisis of religious education. Evidently, this education must be led in accordance with the higher objectives of Islam and we should build into the children's mind that their pursuit of knowledge should be for the sake of knowledge and undertaking the responsibility for their personalities to be well balanced and reliant on knowledge, skills and values. We should also encourage their spirit of free research and examination and work on correcting the mission of educational institutions to have education and ethics as their highest end beyond trade and money.
- The imams, muftis and other specialized scholars should simplify sciences and knowledge for people and demonstrate practical ideals of the messages they promulgate to affect and educate people efficiently.
- Stressing the importance of the higher objectives of education as deduced from the knowledge sources of Islam, including the Qur'an, the Sunnah, the early Muslim heritage and similar sources. The theory of maqasid (Objectives of Shari'ah) should be seen as an excellent theory and a noble contribution to the human thoughts. Broadly speaking, it is humane and universal as it offers a great service to the world by means of guidance and advice in isolation from useless memorization and brainwashing. The higher objectives as suggested by the participants may be epitomized as follows:
  - 1. Developing the perceptive faculty:** that is to develop the powers of mind and perception including the faculties of comprehension, analysis, contemplation and meditation and avoid blind imitation.
  - 2. Understanding the Islamic vision of the universe:** that is to assimilate the Islamic vision of man, universe and life, which overlaps with values.
  - 3. Reforming the earth and the community,** this is the synonym of human stewardship over the earth.

**4. Helping human mutual relationship, coexistence and cooperation** to materialize through the right human mutual relationships, fruitful cooperation and safe coexistence among the individuals of communities, the nations and the world as a whole irrespective of races, ages, religious backgrounds, cultural settings and geographical regions.

**5. The attainment of God's pleasure**, that is to achieve the greatest objective of creation, namely, the sincere worship of Allah in pursuit of His Pleasure (may He be Exalted).

Researchers and scholars held different views on the terms used as names of educational aims; some call them “general and partial objectives, which may be major and minor” whereas others call them final ends, whether short-term, medium-term or long-term ends. Some affirm the values but differences are there concerning their numbers, which may be attributed to the different backgrounds of researchers and their ability to deduce, infer, abstract and discuss in length. For example, some experts summarize the higher objectives of education in two major parts:

**1) Success and salvation in the hereafter**, which bring about the preservation of religion, the first and foremost objective of the five Islamic major objectives.

**2) Success and excellence in this life** that guarantees the preservation of the other four objectives of Islam, namely, the preservation of human life, intellect, lineage and wealth.

At last, Prof. Tariq Ramadan concluded the seminar expressing his deepest thanks to professors, scholars and experts for their contributions to the seminar success and achieving its goals. He also extended his thanks to the CILE’s personnel for their significant efforts in the careful organization and arrangement of the seminar to ensure its smooth running and success.

Chauki Lazhar, CILE Deputy Director, also highly praised the research paper authors, commentators and all other participants in the seminar. He emphatically stated the paramount necessity of continuing dialogue and discussion taking this seminar as a starting point for better cooperation, thinking and contemplation on the theme in the future.
