Weton/Taqwim/Kalendar Malayonesia

Tahun orang Malayonesia bermula pada tahun 78 M dan dinamai tahun Saka. Oleh itu setiap T Masehi = (T -78) Saka. Tahun Saka dipakai oleh orang Malayonesia hingga abad ke-15 M, walaupun tahun Hijrah telah mulai digunakan sekurang-kurangnya sejak akhir abad ke-13 M. Nama bulan orang Malayonesia ketika itu ialah mengikut bulan Hindu dalam bahasa Sanskrit seperti berikut:

Bulan satu dinamai Caitya/Chaitra/Caitra (30 / 31* hari) mulai Mac/Maret 22 / 21*,
Bulan dua dinamai Waisyaka/Vaisakha (31 hari) mulai April 21,
Bulan tiga dinamai Jesta/Yaistha (31 hari) mulai Mei 22,
Bulan empat dinamai Asadha (31 hari) mulai Jun/Juni 22,
Bulan lima dinamai Syrawana/Shravana (31 hari) mulai Julai/Juli 23,
Bulan enam dinamai Badra/Bhadra (31 hari) mulai Ogos/Augustus 23,
Bulan tujuh dinamai Aswina/Asvina (30 hari) mulai September 23,
Bulan lapan dinamai Kartika/Karttika (30 hari) mulai Oktober 23,
Bulan Sembilan dinamai Agrahayana (30 hari) mulai November 22,
Bulan sepuluh dinamai Pausa (30 hari) mulai Disember/Desember 22,
Bulan sebelas dinamai Margasirsha/Margasirsha/Magha (30 hari) mulai Januari/Januarius 21, dan
Bulan dua belas dinamai Falgana/Phalgana/Phalguna (30 hari) mulai Februari/Februarius 20.
(* menandakan bulan untuk tahun lompat).

Nama bulan di atas ada dirakamkan pada prasasti (batu bersurat atau inskripsi) dalam bahasa Malayu/Melayu sejak abad ke-7 Masehi; tetapi yang dijumpai setakat ini, ialah Caitya (Chaitya), Caitra (Chaitra), Waisyaka (Vaisakha), Jesta, Kartika (Karttika), Margasirsha (Margasirsha), dan Falgana (Phalgana) sahaja. Yang lain itu diambil daripada bulan Hindu dalam bahasa Sanskrit kerana yang dijumpai pada prasasti itu memang sama dengan bulan Hindu itu.

Pengenalan ASASI

Akademi Sains Islam Malaysia atau lebih dikenali sebagai ASASI ditubuhkan pada 1977 oleh sekumpulan ahli sains dan teknologi muslim Malaysia. Pada mulanya Akademi ini memang tidak ditujukan kepada ahli sains sosial atau kemanusiaan, tetapi mulai lebih kurang sedasawarsa penubuhannya, perlembagaannya dipinda supaya semua ilmuwan dalam bidang apa pun dapat menganggotainya sesuai dengan makna sains mengikut perspektif Islam. Kini anggota ASASI menjangkau lebih daripada 300 orang ahli (kebanyakannya ahli akademik dan peiktisas) dalam pelbagai bidang ilmu. Sesiapa yang memiliki ijazah dalam apa juga bidang layak memohon menjadi ahli biasa ASASI. Selainnya bolehlah memohon untuk menjadi 'ahli bersekutu'. ASASI juga menawarkan kepada seseorang individu menjadi ahlinya bertaraf Anggota Kehormat jika seseorang rakyat Malaysia Muslim itu dianggap banyak memberi sumbangan pembangunan sains atau teknologi kepada umat Muslim di Malaysia.

Tujuan

1. Untuk menghidupkan semula tradisi sains berasaskan al-Quran, iaitu satu bentuk kajian tentang alam tabii atau fenomena dan telatah yang tidak memisahkannya daripada prinsip-prinsip Islam.
2. Untuk memperkenalkan dan mendokong konsep dan falsafah sains Islam bersama-sama dengan etika Islam dalam kegiatan sains dan penyelidikan.
3. Untuk menggalakkan kajian sains di kalangan masyarakat dan menjadikan al-Quran sebagai satu daripada sumber inspirasi, hidayah dan rujukan dalam kegiatan sains.

4. Untuk berpegang teguh kepada keinginan dan tekad bagi mengembalikan bahasa Arab, sesuai dengan perannya sebagai bahasa al-Quran, kepada kedudukannya yang asal dan betul sebagai bahasa sains dalam dunia Islam.
5. Untuk melakukan usaha memadu, mengamir atau mengintegrasikan dan menggembeleng para ilmuwan muslim ke arah membangun dan memajukan masyarakat Islam terutamanya dalam S & T.
6. Untuk bekerjasama dengan organisasi-organisasi lain, dalam dan luar negara. Bagi memastikan kegunaan ilmu sebagai alat untuk mencapai kebahagiaan di dunia dan akhirat dan bukan untuk pemusnahan insan.

ASASI menerbitkan warkah berita dwitahunannya berjudul ASASAINS sejak penubuhannya, dan sejak 1990 ASASI juga menerbitkan jurnal ilmiah dwitahunannya berjudul Kesturi. ASASI juga menerbitkan buku-buku ilmiah dan pascasidang kepada simposium dan sebagainya anjuran ASASI dari masa ke masa, terutamanya tentang pengislaman ilmu atau isu-isu semasa mengikut perspektif Islam seperti buku-buku berikut:

Comparative Islamic Studies – Denmark. Equinox Pub. Sejak 2006. Dwitahunan

Comparative Islamic Studies aims to advance research on Islam through comparisons between Islam and other religions, and between religious and non-religious factors and disciplines. Regarding Islam and other religions, CIS extends the scope of comparisons of Islam and Islamic Scripture from the traditional focus on Judaism and Christianity to include religions of Antiquity, Africa, South- and South East Asia, China, Oceania, Europe and the Americas, as well as contemporary new religious movements, spirituality and the various types of esotericism.

The Journal especially seeks studies, which compare by focusing on the interaction between religious and non-religious factors and disciplines in the selected cases. In addition to contributing to the study of Islam, this relatively unexplored approach should inspire new ways of conceptualising and writing the histories of relations between religious and non-religious knowledge disciplines and methodologies. In this way, such comparisons might contribute also to the history and theory of science

The Sociology of Islam and Muslim Societies Newsletter

The major aim of this network is to study and understand the sociological aspects of Islam and Muslim Societies. In this context, the concept of Sociology of Islam has been borrowed from Dr. Ali Shariati, whereas the concept of Muslim Societies was borrowed from Ernest Gellner's argument. We believe that these two scholars represent core aspects of current changes in Islam. Both scholars rejected the

Orientalist understanding of Islam and Muslims. Therefore, we take a similar approach in this network.

+*Jour. for General Philosophy of Sc.* – dwibahasa: Jerman dan Inggris. Sejak 1970. katertahunan

Its subject matter encompasses the philosophical, especially methodological, ontological, epistemological, anthropological, and ethical foundations of the individual sciences. The coverage brings the natural, cultural, and technical sciences into a philosophical context, including discussion of historical presuppositions and conditions of the current problems of the philosophy of science. The Journal bridges gaps between the different sciences, especially the natural, cultural, and social sciences. Its discussion exposes the common as well as the divergent methodological and philosophical foundations of the individual sciences, and takes into account all currently relevant positions of the philosophy of science. The journal considers the historical dimension of the sciences as context for understanding current problems of philosophy of science.

MAKALAH FITURA

Pemerolehan Manuskrip Melayu di Belanda*

Manuskrip Melayu (bahasa Melayu beraksara Jawi) di Leiden memang terkenal kewujudannya dengan banyaknya sehingga ada yang mengatakan di situlah yang paling banyaknya. Beberapa tahun ini diberitakan (daripada beberapa sumber, khasnya sarjana pengajian Melayu-Indonesia di Eropah) bahawa pusat-pusat pengajian Melayu yang masyhur, iaitu di Leiden dan London akan ditutup. Pelbagai berita lagi timbul daripada ekoran itu seperti segala manuskrip Melayu di pusat-pusat pengajian ini akan dijual/dilelong. Berita yang penjualan/pelelongan manuskrip itu tidaklah benar. Pusat-pusat pengajian Melayu baharu yang dikatakan ingin menggantikan kemasyhuran Leiden dan London ini seperti di Jerman, Perancis, Amerika Syarikat dan bahkan Australia (di ANU, Canberra) dikatakan amat berminat memperoleh manuskrip di London dan di Leiden itu, dan jika benar berita itu nescaya sudahlah lama manuskrip-manuskrip dibeli seluruhnya oleh institusi baharu ini. Yang benarnya, dan inisientiasalah berlaku, bahawa salinan manuskrip di Leiden itu boleh dibeli dengan harga yang telah ditetapkan oleh institusi berkenaan; manakala manuskrip di London itu telah pun dijadikan mandala awam sahaja (iaitu sesiapa pun dapat mencapainya secara percuma sahaja akan Salinannya).

Di Belanda, tempat-tempat tersimpannya manuskrip Melayu bukanlah hanya di Universiti Leiden sahaja bahkan ada beberapa tempat lagi termasuklah sebuah tempatnya yang agak masyhur juga banyaknya pungutan manuskrip dan buku-buku Melayu dalam pelbagai genre terbitan dahulu-dahulu sehingga kini, iaitu di KITLV (*Koninklijk Instituut voor Taal-, Land-en Volkenkunde*= Institut Diraja Belanda Pengajian Asia Tenggara dan Karibea). Berita terakhir yang kami terima, semua buku di pusat ini sudah pun diambil oleh pusat pengajian Melayu di Jerman tetapi manuskrip Melayunya diletakkan di Universiti Leiden. Walaupun ada manuskrip Melayu di Belanda terutamanya yang di Arkib negaranya dikatakan belum dikatalog lagi (dianggarkan hampir mencecah ribuan juga) tetapi yang di Universiti Leiden dan di KITLV itu sudah dikatalog sepenuhnya dan dijadikan dalam bentuk mikrofis/mikrofilem/mikrofom dalam tahun 1999 lagi. Memang benar, ada sebahagian kecil manuskrip Melayu di Leiden dan KITLV itu yang salinan mikrofis/mikrofilem/mikrofom-nya sudah dibeli oleh Perpustakaan Negara Malaysia, tetapi kajian Shaharir (2003) dan Zawiyah drk (2014) menunjukkan jumlah semua manuskrip Melayu di PNM itu pun masih amat sedikit berbanding dengan di Leiden itu (malah manuskrip dalam bidang S & T yang disalin drp Leiden itu hanya ada 41 judul salinan sahaja).

Usaha kerajaan Malaysia (menerusi institusi-institusinya, terutamanya university yang ada Pengajian Melayunya) patut ditingkatkan lagi untuk mendapat semua salinan manuskrip di Leiden itu dan kinilah masanya yang genting kerana kini terlampau banyak pusat pengajian Melayu yang

baru-baru dan berminat terhadapnya seperti yang tersebut di atas sehingga kita terlepas lagi menjadi pusat pengajian Melayu yang ulung.

Apakah langkah-langkah kita untuk memiliki manuskrip kita di Leiden itu? Oleh sebab berita mutakhir yang kami dengar Belanda tidak mungkin menjual manuskrip Melayu demi ekonomi negaranya daripada sumber pendapatan daripada manuskrip ini terlestarikan, dan oleh sebab semuanya sudah pun dimikrofis/ mikrofilem/ mikrofilmkan sejak 1999 dan dikatalogkan selengkapannya oleh sarjana kita juga, Teuku Iskandar (dari Aceh), mereka hanya bersedia menjual salinan katalog dan memang dalam bentuk mikrofis/mikrofilem/mikrofilm itu sahaja. Jumlah katalog Teuku Iskandar (1999) itu ialah 2000 judul katalog (setebal dua jilid: Jilid pertama 1,500 judul katalog dan jilid kedua 500 judul katalog). Setiap judul katalog itu biasanya mengandungi banyak manuskripnya sehingga ada yang berjumlah puluhan manuskrip pula. Ketebalan manuskrip per judul katalog itu dianggarkan setebal 100 pipi/halaman.

Yang terbaiknya tentulah kita membeli seluruhnya (salinannya) yang berjumlah 2 ribu judul katalog itu. Kosnya dianggarkan RM 50 (dua ratus ringgit Malaysia) per halaman mikrofilm itu. Oleh sebab jumlah halaman semuanya ialah 2 ribu x 100 pipi= 2 ratus ribu pipi, maka **anggaran kos semua manuskrip itu ialah RM 10 juta sahaja**. Jika ini dianggap terlampau besar kosnya (terutamanya ketika negara sedang menghadapi keadaan kewangannya yang gawat ini), maka disyorkan supaya kita menumpukan kepada manuskrip sains dan teknologi sahaja. Berasaskan kajian Shaharir (2003) dan Zawiyah drk (2013) ada sekitar 300 buah katalog manuskrip S & T Melayu di Leiden, tidak termasuk yang biasa juga kedapatan unsur ilmu ini dalam manuskrip sastera dan keagamaan (terutamanya tasawuf dan tawhid) seperti yang ditunjukkan oleh KuPELEMA (2012). Ini bermakna sekitar 15 % daripada katalog manuskrip di Leiden itu adalah dijangkakan berkenaan dengan ilmu S & T. Oleh itu **kos untuk memperoleh manuskrip S & T di Leiden ialah sekitar RM 2 juta sahaja**. Senarai spesifiknya, dapatlah diusahakan oleh kumpulan penyelidik manuskrip S & T yang diketuai bersama oleh penulis saranan ini (Shaharir dan Alinor) dengan meneliti katalog manuskrip manuskrip di Leiden yang telah disebut di atas. Ini pastinya akan dilakukan sebaik sahaja ada komitmen dari pihak penaja yang berminat memperolehnya seperti yang kami harap-harapkan ini, iaitu PKMM, di UM; setelah gagal mendapat komitmen daripada beberapa buah institusi lain yang pernah dihampiri oleh penulis ini.

Beijing Digital Humanities Special Interest Group 11/2019 Seminar Report

Discussion Topic:

How can humanities scholars and non-humanities scholars best collaborate in the field of digital humanities?

Discussion Aims:

In recent years, as the field of digital humanities develops rapidly in China, lectures, workshops and seminars have become major formats for the presentation and discussion of digital humanities topics. As basic awareness of digital humanities concepts, methodologies and tools reaches an ever-greater audience, we are increasingly faced with a series of pressing questions: how can scholars deploy their new skills to address research questions in the humanities, and how can these tools and methodologies be developed and improved? We hope to proactively address these questions by means of the Digital Humanities Special Interest Group (DHSIG), a regularly meeting interest group at Peking University.

DHSIG meetings will provide a venue to tackle questions of digital humanities tools, methods and theories in round-table discussion. Rather than focusing on a single presenter, discussions will be conducted freely under a discussion leader’s guidance. Materials will be shared in advance so as to provide a basic understanding of the topic at hand and offer participants the opportunity to participate equally in discussion. To encourage students’ active participation, at each stage of our discussion, we will first offer students the opportunity to voice their perspectives before opening the floor to all attendees. We will seek to arrive at a common consensus on each of our topics, and after our meeting concludes, we will compile these thoughts in the form of a proposal that we will then publicly issue. (This proposal may include a number of different complementary or even

opposing arguments.) We hope that these proposals can provide workable plans of action to scholars in the digital humanities and help to guide further research in the field.

Our Proposals

What problems do humanities scholars hope to answer with digital methods?

1. How to handle simple but time-consuming research tasks.
2. How to create visualizations that paper-based methods do not allow.
3. How to automate methods of solving otherwise complex or convoluted problems. For instance, when dealing with ancient texts, automation of the following tasks: collation, copying, citation checking, converting between different calendar systems, generation of family trees, interpretation of seal carvings or archaic writings, et cetera.
4. How to empirically describe qualitative impressions and conclusions. For instance, finding quantifiable ways to express certain conclusions regarding different editions of a given text.

When collaborating on digital humanities research, what points should humanities scholars and non-humanities scholars keep in mind?

1. When non-humanities scholars embark on humanities research, or when humanities scholars embark on non-humanities research, it is necessary to abide by the scholarly norms and standards of the field.
2. For those fields relevant to the digital humanities (e.g. literature; history; philosophy; mathematics; computer science; statistics), we propose that an index of specialized vocabulary should be prepared, such that colleagues in different disciplines can understand one another's terminology.
3. When scholars collaborate on publications in the digital humanities, we propose that the paper's authorship should be decided by means of cooperative and egalitarian consensus.
4. When scholars collaborate on research in the digital humanities, we propose that they communicate recent research developments in their fields to their cross-discipline colleagues in layman's terms.

What training do humanities and non-humanities scholars need when doing work in the digital humanities?

Recommendations for humanities scholars:

1. To learn a programming language (such as Python), so as to understand exactly what programming can accomplish in the humanities.
2. To learn to use regular expressions, or if those pose a difficulty, at the very least the use of wildcard characters when searching in Word.
3. To understand the use of encodings such as ANSI, GB, GBK, BIG-5, UTF-8, Unicode.
4. To understand basic Excel functions such as VLOOKUP, IF, LEFT, RIGHT etc.

Recommendations for non-humanities scholars:

1. To first read Prof Rong Xinjiang's book "Academic Training and Academic Norms: An Introduction to the Study of Early Chinese History".

How do we evaluate the results of digital humanities projects and research?

1. Evaluations of digital humanities projects and research should emphasize their scholarly contribution to humanities fields.
2. The importance of engineering in digital humanities research must not be understated. We propose the following evaluative angle for the engineering work that goes into a digital humanities paper:
 - A. The accuracy with which it addresses needs in the humanities
 - B. Its systematic approach
 - C. The reproducibility of the project's engineering methods
 - D. Its ease of use and usefulness for humanities scholars
 - E. The ability of data and/or tools to be reviewed by humanities scholars
 - F. Compatibility with other projects
 - G. Rate of citations in humanities scholarship
3. We propose that data, models, algorithms and code should be publicly available and open-source. This enables digital humanities research to be reproduced and reviewed, while
